

## Firenze Custom Modules

Learn all about the exciting new RocketTheme exclusive modules that are included in the Firenze template release. Here you can find instructions for installation and configuration for each of the custom modules.

### Step One: Installing the module

Download the **Firenze\_extensions.zip** archive from the **Firenze** download section of the RocketTheme Joomla! Club. Unzip the archive, inside you will find individual zip files for each of the modules. Login in to your administrator console on your Joomla! website and navigate to the **Installers** menu item, and select **Modules** from the dropdown menu.

In the **Upload Package File** section, click the **Choose File** button and select one of the **mod\_modulename.zip** that was inside of the zip file you downloaded earlier. Next click the **Upload File & Install** button to install the module.

### Step Two: Publishing the Module

Now the module is installed it must be published in the appropriate module position and configured to suite our needs. From the top menu, select Modules then Site Modules. This will take you to the Site Module Manager which allows you to configure the placement and configuration of all modules in your Joomla! website.

### The RokSlide Module

In the Joomla Administrator, go to **Site** and then **Site Modules**. This will bring up a list of all of the installed modules. Find **RokSlide Module** on the list and click on the title to go to the Module configuration.

Below are the configuration options for RokSlide on the demo.
