» Fully compatible IE7+, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
» Delivered with source Adobe .PSD files.
» Delivered with “QuickStart Package”.

CORPORATE - Overview files

After downloaded all the files available on our exclusive MemberShip commercial section and also some files that are available on our free tools section, let´s see a brief overview inside the CORPORATE package release. Since some tools used on this template have their own HelpFile, we will give you here the major orientation guide to make your installation. For further details about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

So, here's a brief overview of the files available inside the "CORPORATE" Template pack release.

You downloaded the following 2 compressed files:

» gk_corporate_J!15.tgz - This is the template file installation.

» gk_corporate_J!15_rest_files.zip "Before running... please unpack the .zip pack file."

After unpack, the "gk_car_magazine_J!15_rest_files" folder contains the following files:

» _doc!!! "folder"

Here's the present Instructions Manual. For the PhotoSlide GK2 Component and also the News Show GK3 module HelpFiles, you can find them inside the respective tools package.

» _quickstart!!! "folder"

The CORPORATE comes along with a QuickStart package version installation. Please, read the respective chapter.

» Components "folder"

Contains instructions to download the component that is necessary to use on the CORPORATE template. Since this tool is free and have his own HelpFile, please download the respective package from our free download section.

» Modules "folder"

Contains instructions to download the modules that are necessary to use on the CORPORATE template. Since this tools are free and have their own HelpFile, please download the respective package from our free download section.

» Source "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design.

Notice!! The font(s) type used on the source files are not provided with the Template package, because they may have copyrights reserved.

IMPORTANT!!!

Other files necessary and not available on package.

Like explain before, to complete the necessary files, you must download from our free tools section the following files (go to http://tools.gavick.com or to http://www.gavick.com/downloads-area/):

» PhotoSlide GK2 component package (Unpack first the photoslide_2_packzip file!).

There you will find the component and also the following new files for this template (they are located here, because it will be available for free donwload).

GK News Image I module (*mod_news_image_1.zip*) - this is the upgrade version module for slide news show for the photoslide component (Installation: use the Joomla Installer).

GK News Image I plugin (*plg_gk_news_image_1.zip*) - this is the necesssary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the module (Installation: use the Component Installer).

» News Show GK3 module package (Unpack first the news_show_gk3_pack.zip file!)

Here you can find this following files needed.

GK News Show GK3 module (*mod_news_show_gk3.zip*) - this is the module (Installation: use the Joomla Installer).

GK News Show GK3 plugin for PhotoSlide GK2 (*plg_news_show_gk3.zip*) - inside of the plugin_for_photoslide_gk2 folder, you will find this file. It's the necesssary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the News Show GK3 module (Installation: use the Component Installer).

After you get this files, please unpack first and use them when needed, as we explain in next chapters.

Here are some recommendations that you should considerate and might help you.

Are you new in Joomla? If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System) and visit the oficial support forum of www.joomla.org for any problem direct related. Nevertheless, we will be happy to help you if possible in our support forum.

Building a new Joomla Website ? If you are building a new website and if you like our demo, we strongly recommend you to use the QuickStart version and from them, change it to your own content and configuration.

Get quick acquaint with CORPORATE template! In all cases, if you are a new or already experience user, we recommend that you install a experimental version, using free popular local server like XAMPP or WAMP (you can find easily information on internet about this excellent tools for website development) or if you wich, an online test installation. This way, you be able to fit in more fast and easier way in some configuration tools, modules positions and other particular details that you need to know.

You already have a website and want to use this template ? If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla (present version - J!1.5.10). If not, please upgrade to insure total compatibility with our template and tools. Naturally, if this is your case, you must install all files individual, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version still is an important ally to help you. Just remember the previous recommendations.

Do you have some problems with our tools ? Some usual problems reported on our support forum are originated from script conflict with 3th party tools. If you know Joomla suficient enough, you already know that there is a huge amount of solutions and extensions available for free or some commercial from other team or developers. Naturally, you will search others extension to complete some particular funcionality and your website needs, but understand that we are responsable only for our template and tools; and we cannot garantee that all 3th party extensions will work perfectly with our template or tools. So, it is your hands and it is your responsabity to choose those extensions on Joomla Comunity. Anyway, you always can ask for support in our forum and if is possible, we will try to help you.

Another usual problem reported in our forum, is related with permissons on files and directory. Some tools need that some specific files are set with rewrite or read permissions, so you can find some problems if you don't have this permissions set. Take note that we cannot control your server security configuration, but we can point you directions were you must change this permissions. If you are unable to change it, we recommend that you contact your host server provider.

Keep always updated! We strongly recommend that you visit us regularly on update.gavick.com, were you can see the latest updates of our templates, components, plugins and modules. If you have any problem, be sure the solution is not already available and you will avoid waste time searching or asking for solutions in our forum support.

Need some small CSS style customizations adjustments? You can always request some support from our Moderators or Developers, but you need to take in mind that this is customization and not regular support service. We are considerating in the future to create personnal customization and installation services support for those who need it. The Developer MemberShip is excluded, since this service is already available for this subscription. Nevertheless, we will always available to try to help you.

If you have some experience in CSS styling, we strongly recommend the use one of the most powerful tool for WebDesigners, available for free in FireFox browser - The FireBug addon - a perfect ally and work tool.

What is the better way for me to place a problem in the support forum? If you need help in some issue, please post it in our forum support in the most objective way, preference in english language and with an URL to show us the problem. This way, we will be able to give you the needed help in faster way.

Need to contact Us? Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply to you as soon as posible.

CORPORATE QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediatly of all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files needed. It will set your joomla website exactly as we show the CORPORATE Template in our demo.gavick.com.

Again, we invite you to visit us regulary, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respetive tools. So, keep in touch on update.gavick.com.

Sugestion!!!

You can easily get acquaint of the CORPORATE template environment, by making some local tests, using a local server like (i.e. XAMPP or WAMP Servers) or others available for free in the internet. By installing this local servers, you be able to install, run and test easily all the potencial of this template without any problems. This make all the difference and we garantee you that will avoid wasting time by searching our support forum, when the answer is already available on the QuickStart version.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

Installation Steps for the QuickStart!!! version :

Step 1) Unpack the compressed file gk_corporate_J!15_rest_files.zip and you will find inside the _quickstart!!! folder. Enter inside and you will find the QUICKSTART_APR2009.zip file.

Step 2) Unpack the compressed file QUICKSTART_APR2009.zip inside of the _quickstart!!! folder and upload all the content inside of the QUICKSTART_APR2009 folder to your clean website directory. You will notice that this files are similar to a normal Joomla!1.5 package. That's because it's like a normal joomla installation.

Step 3) Create a new database using MyphpAdmin that you should have it installed in your cpanel website.

Step 4) Make a normal Joomla J!1.5 installation steps using the upload files. Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.

Step 5) Like a normal joomla installation, you must delete or rename your "installation" folder in your new website installation.

Step 6) After ending the installation, enter in the Administrator using Username "admin" and password "demo" *(Naturally, you can change this values after!!!).*

That's it! Easy, was not? Of course it was.

If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and make guidance use of our tools configuration.

CORPORATE Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further details information, we prepare the following short cut step by step task list for the CORPORATE installation. Naturally, we will assume that you already have a joomla!1.5 website.

» Step 1 - Install the CORPORATE template (*gk_corporate_J!15.tgz*) using the Joomla Installer.

» Step 2 - Go to the Templates Manager and set the "gk_corporate" template to default.

» Step 3 - Using the Joomla Installer, install the PhotoSlide Gk2 (com_gk2_photoslide.zip) component.

» Step 4 - Go to the PhotoSlide GK2 administration (do not use the joomla installer!!!), select "plugins" menu and install the Gk News Image I plugin (*plg_gk_news_image_1.zip*) and (optional) the News Show GK3 plugin (*plg_news_show_gk3.zip*). Don't forget to enable this plugins!!! You now can start working, if you wish, creating your slide groups on the PhotoSlide GK2 administration.

» Step 5 (Optional) - Go to the PhotoSlide GK2 administration, select "Extensions" menu and install the Rainbow Extension tool (ext_rainbow.zip) and the EasyLinks Extension (ext_easylinks.zip). Don't forget to enable this extension, if you want to use it.

» Step 6 - Go the Joomla Installer! and install the News Image I module *(mod_gk_news_image_1.zip)*.

» Step 7 - With all previous 6 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

Demo Modules Positions

The following screenshot contains a resume list of the modules used on the demo template and the respective positions. For each modules configuration, we recommend that you make an experimental installation locally or online, using our quickstart version. For your orientation, please check inside the DemoModulesConfigurations folder and you will find some screenshot of the Gavick Tools modules configurations used on this template. This might help those who don't use the QuickStart version installation.

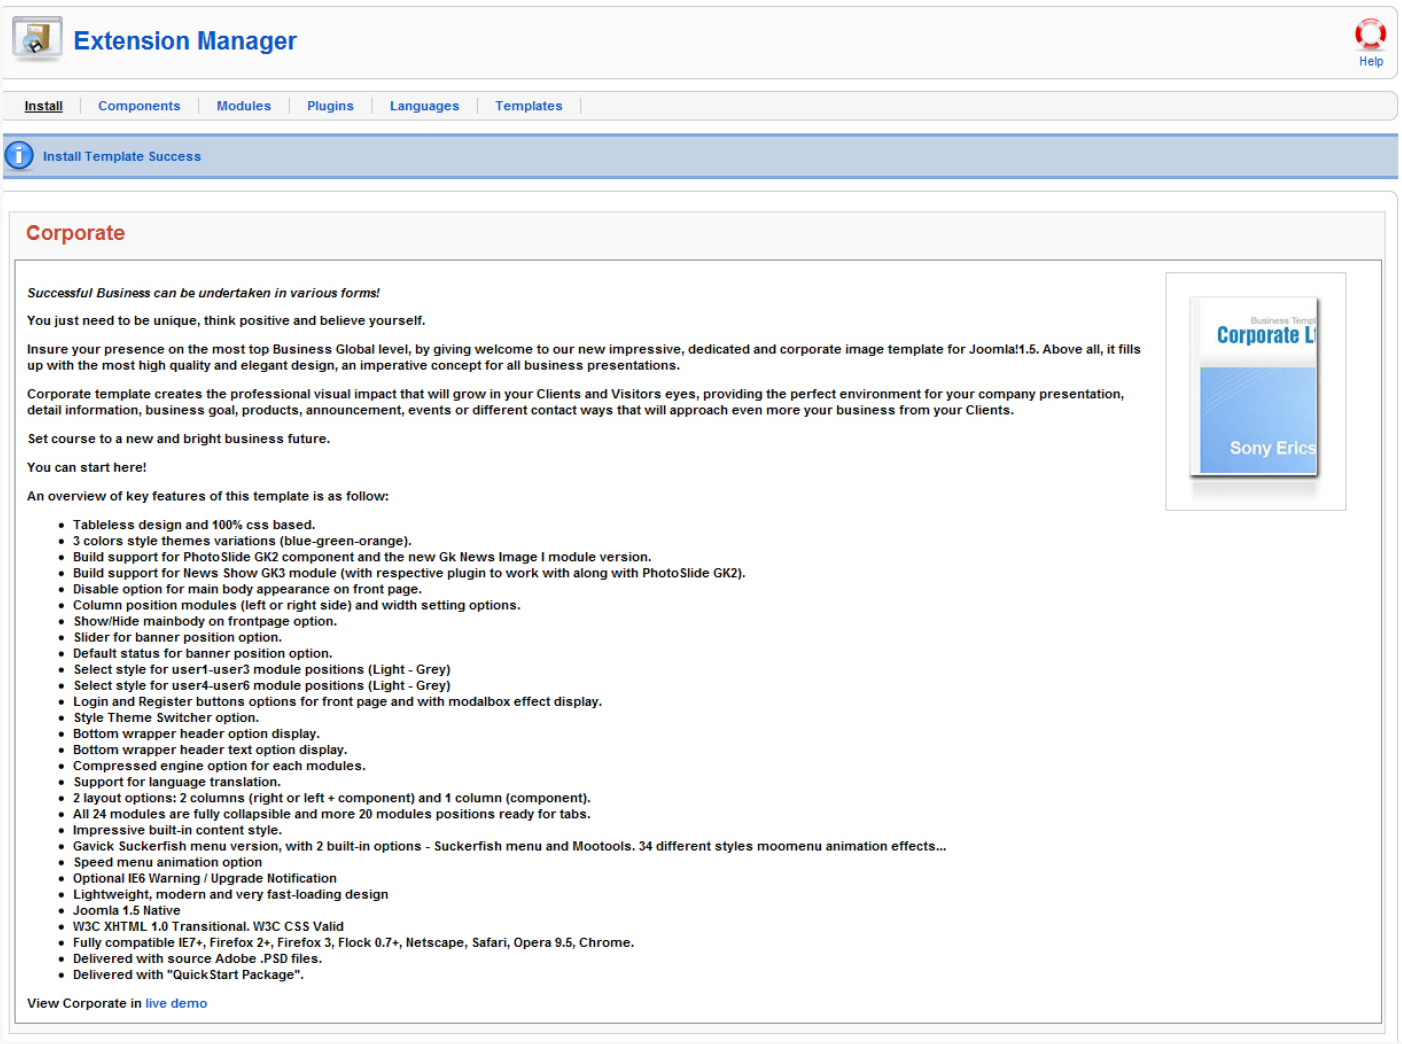
CORPORATE template installation

Start by navigating to your Joomla! Administrator and enter in the administrative panel on your Joomla site.

From the top menu, select Extensions > Install/Uninstall. Click the 'browse' button, select the template file (*gk_corporate_J!15.tgz*) and press 'Upload File & Install.' A message will appear saying 'Upload template - Success.' This page will display an overview of the template.



After the template is sucessful installed, you must set it as your default template. To do that, navigate to Extensions > Template Manager and set it as your default joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the _doc! folder package.

You need to download this package from our free tools download section on www.gavick.com and them unpack first this fiile.

Using the Joomla Installer, search for the com_gk2_photoslide.zip and select “upload and install”

A message will appear saying ‘Upload Component - Success” and it will show you an overview of the template. Then select “Continue”...

Gk News Image I Plugin Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

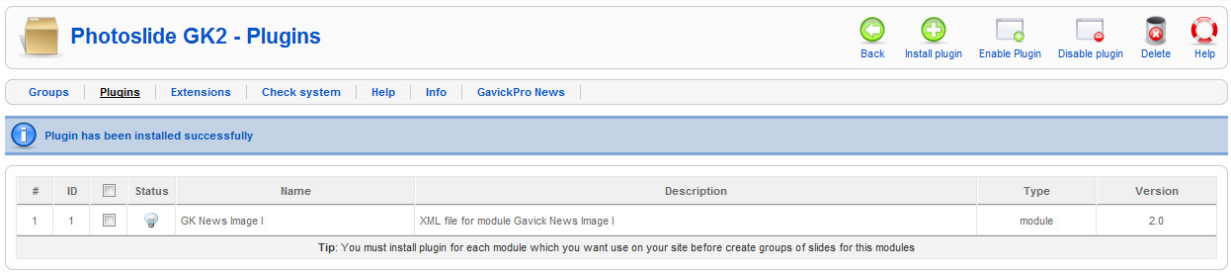
The process installation of the plugin is exactly the same as stated on the HelpFile.

Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator do install any plugin or extension available.

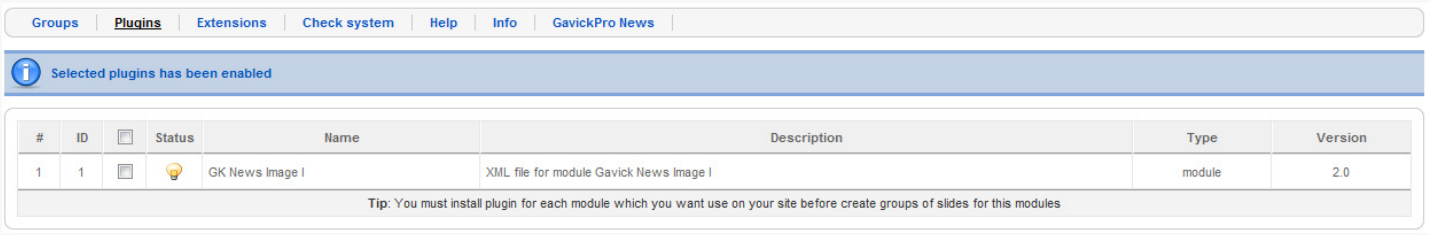
So, navigate to the PhotoSlide GK2 administration, select “plugins” option and choose “Install Plugin”. Then search the plg_gk_news_image_1.zip file locally and click “Save” on right menu.

If all goes well, you should be able to see the plugin sucessful installed, like the following screenshot indicates.



The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

The next step is to select the plugin, by enable the check box and on the right menu, click on "Enable Plugin".



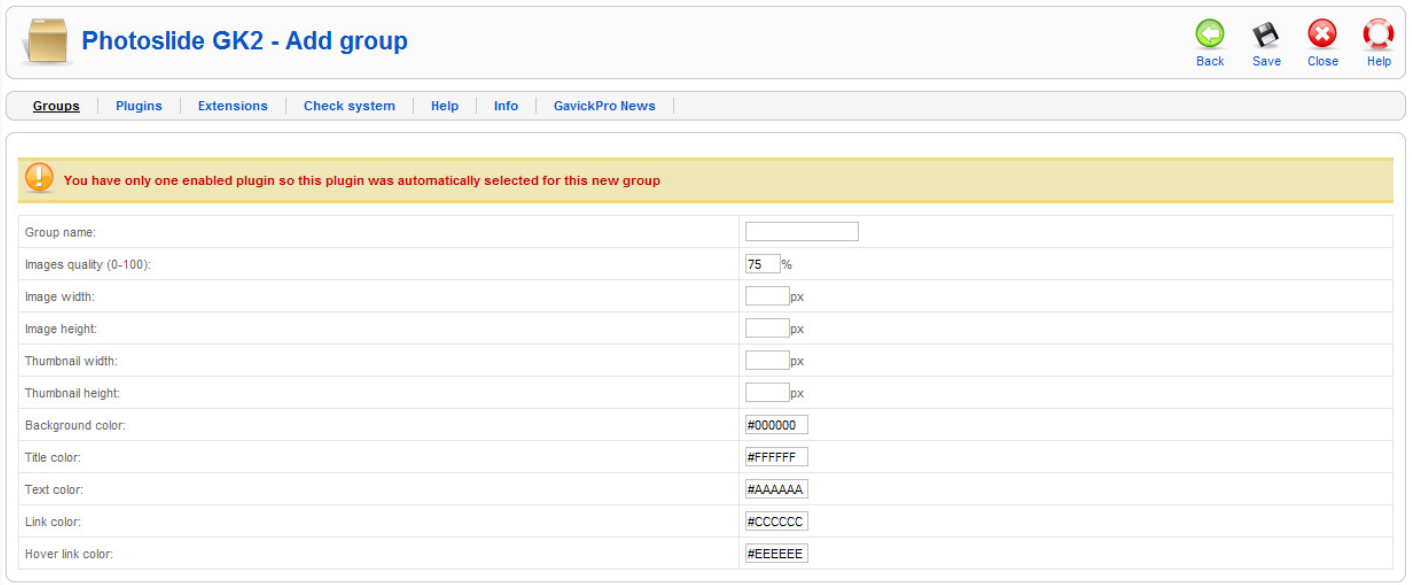
The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let's see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk News Image I is no exception to this rule. So, select the "Groups" option and click on "Add Group" option. As we only have one plugin installed, this will be assume by default on the group creating process.

Here are the necessary parameters to set.



Group name:

For identification of the group, that will be necessary on the module configuration.

Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most posible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

Image width and height:

Set image width and height in pixels.

Thumbnails width and height:

Set thumbnails width and height in pixels.

Background color:

Color value in hex format for background (i.e. #FFFFFF).

Title color:

Color value in hex format for Title (i.e. #FFFFFF).

Text color:

Color value in hex format for text (i.e. #FFFFFF).

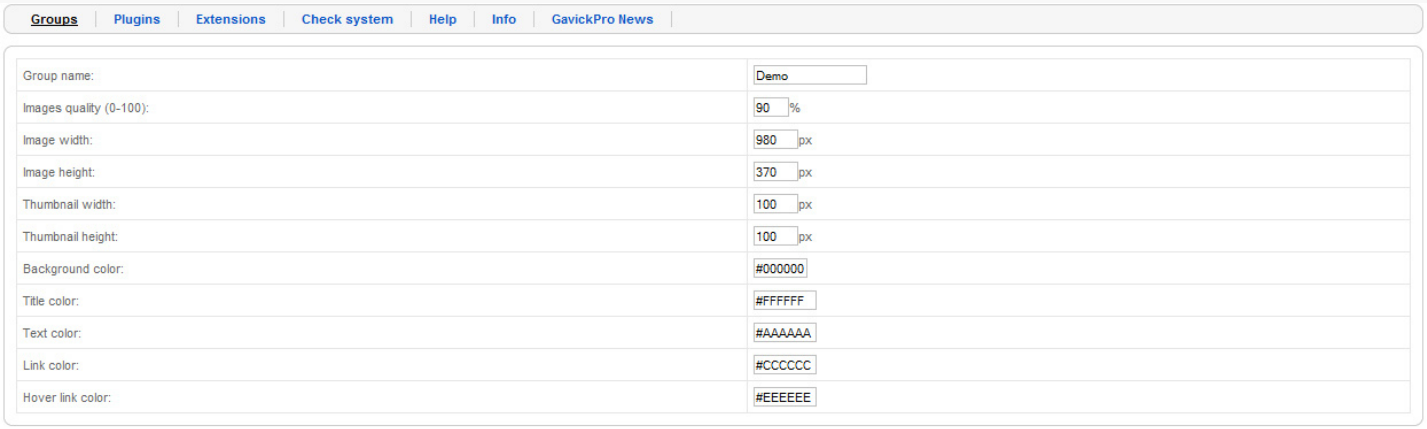
Link Color:

Color value in hex format for Link text (i.e. #CCCCCC).

Hover Link color:

Color value in hex format for Hover Link user event effect (i.e. #000000).

The following screenshot is from the Demo Header Group used on the CORPORATE demo Template and it show the configurations used.

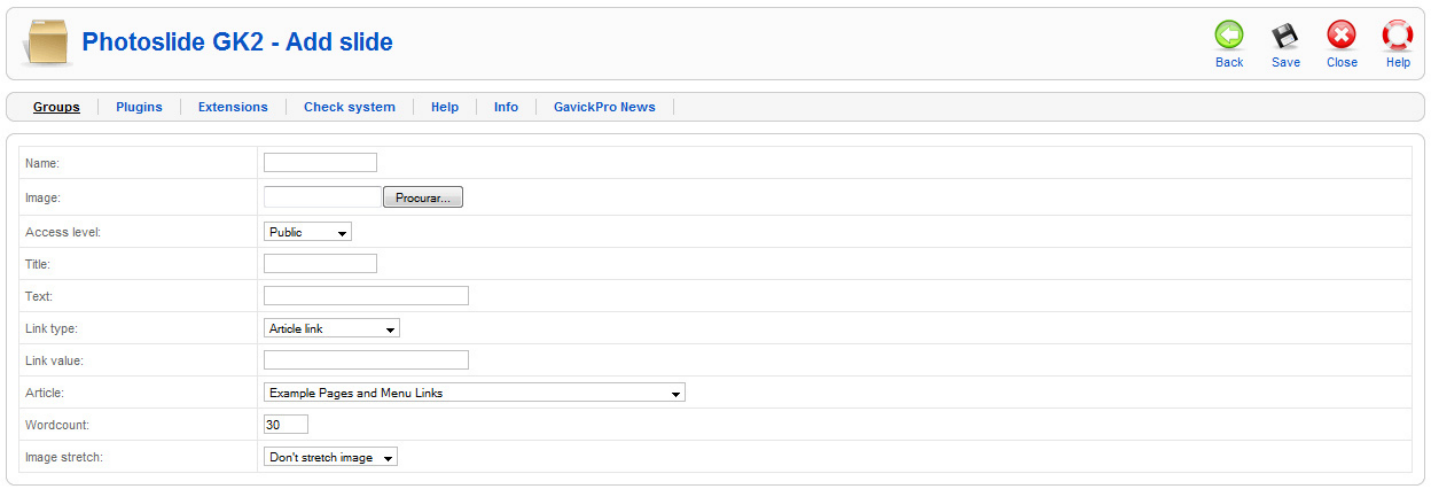


After all parameters are set, save it and the group is ready to receive slides.

Adding Slides to Group configuration

Let us now see how to add slides to the group.

First, open the "Groups" panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the "Add slide" button and set the following parameters.



Name:

Set the name of the slide.

Image:

Select the source image slide for uploading purpose.

Access level:

Set level access for image display (public, registered or special).

Title:

Set news title for module displayment.

Text:

The text of the slide to be show on the module display *(if you choose bellow your own title and text display).*

Link type:

Set if you want your own link or the link of an existent article.

Link value:

If you choose previously your own link type, set it here or leave it blank if you didn't *(ex. http://mylink.com)*.

Article:

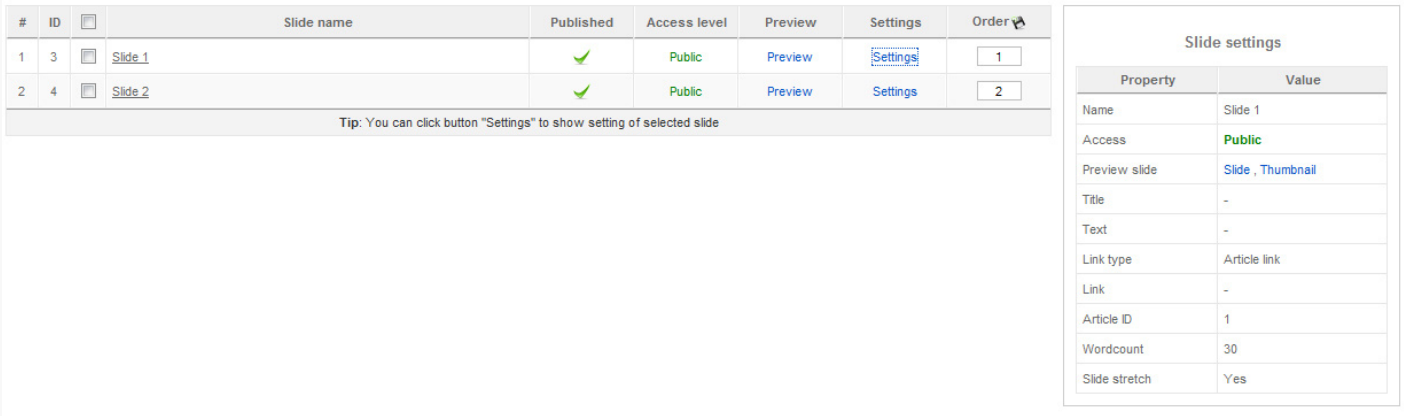
If you choose an article link, set it here or leave the "Your own title and text" set.

Word Count:

Set the number of words to be display on the slide from the article or from your text.

Image stretch:

If you have an image smaller or bigger from the module display option, choose "Stretch image" and this will automatically reset the image dimensions to fill totally the module. This option may withdraw some quality image if the same have some dimension not proportional from the module. If you have a image with same dimension set on the module, set it "Don't stretch image" option.



Screenshot of the group created for the demo template.

After all slides are set on the group, you can see the general content and making use the AJAX setting preview option, you can easily preview all parameters of each slide and also preview the image for purpose display.

News Image I module installation

Using the Joomla Installer, from the top menu select Extensions > Install/Uninstall. Click the 'browse' button, select the News Image I module file *(mod_gk_news_image_1.zip)* and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' them select "Continue..."

News Image I module configuration

After successful module installation, from the top menu, go to Extensions > Modules Manage and enter in panel configuration of the module. Set the module in the header position and enable it. Before you save it, you must configurate the following parameters fields.

Module parameters:

Module Class Suffix:

A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

Module unique ID:

Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newsimage1).

Slides group:

Group with slides *(if list is blank then it means that you must add at least one group in Photoslide GK2).*

Text block orientation:

Select text block - orientation - horizontal or vertical.

Text block height:

Text block height for horizontal orientation.

Clean XHTML:

You can clean your articles from any formatting.

Readmore button:

If you want to show readmore button.

Left interface:

Left interface for tick list and readmore button.

Left interface width:

Left interface width (i.e. 32).

Additional readmore:

Readmore button visible in left interface (if left interface is enabled).

Readmore button text:

Text for readmore button (i.e. Read more).

Title as link:

You can enable link in header of article in text block.

Previous button:

Turn on prev button.

Next button:

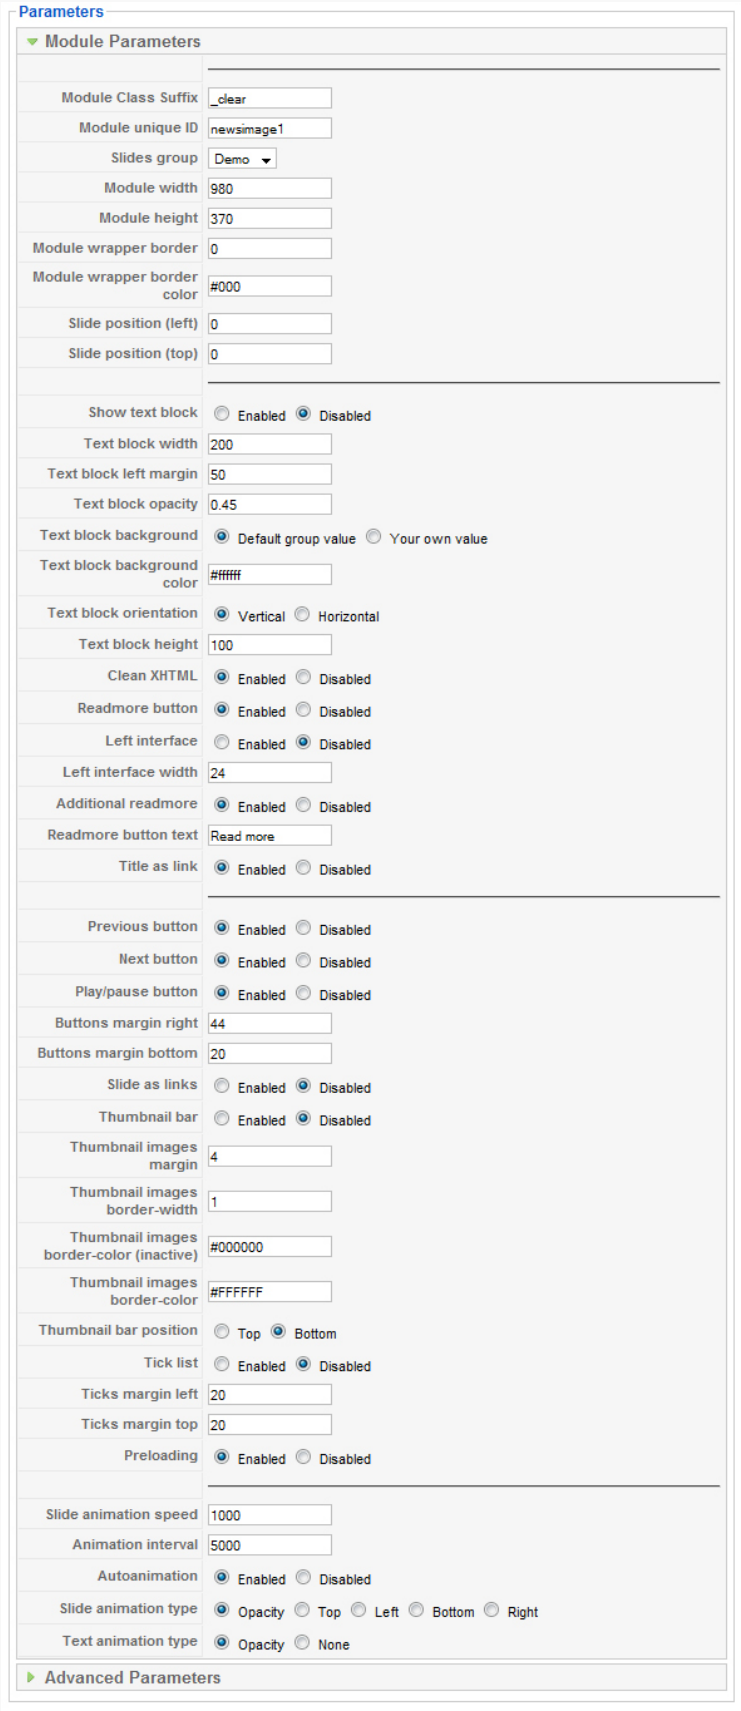
Turn on next button.

Play/pause button:

Turn on play/pause button.

Buttons margin right:

Set margin beetween interface buttons and module right side (i.e. 20)



Screenshot of the module parameters set for the demo template.

Buttons margin bottom:

Set margin beetween interface buttons and module bottom side (i.e. 20).

Slide as links:

Turn on click events for slides.

Thumbnail bar:

Turn on thumbnail bar.

Thumbnail images margin:

Set margin for thumbnails in thumbnail bar (i.e. 1).

Thumbnail images border-width:

Border width for thumbnails (i.e. 1).

Thumbnail images border-color (inactive):

Border color for thumbnails when you click on other thumb in thumbnail bar (in hex format) (i.e. #000000).

Thumbnail images border-color:

Border color for thumbnails when you click it on thumbnail bar (in hex format) (i.e. #000000).

Thumbnail bar position:

Position of thumbnail bar - over or under text in text block.

Tick list:

Turn on tick list.

Ticks margin left:

Set margin beetween ticks buttons and module left side (i.e. 20).

Ticks margin top:

Set margin beetween ticks buttons and module top side (i.e. 20).

Preloading:

Turn on preloading.

Slide animation speed:

Speed for animation effect in ms (i.e. 1000).

Animation interval:

Interval beetween slides in ms (i.e. 5000).

Autoanimation:

Enable if you want to start animation automatically.

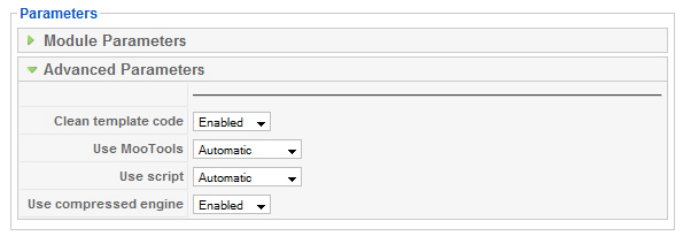
Slide animation type:

Slide animation effect for the module.

Text animation type:

If you want to enable effect for text.

Module advanced parameters:



Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

Use script:

In normal situations, option “automatic” is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

Use compressed engine:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionaly - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

News Show GK3 Module

News Show GK3 module one of the most powerful and popular extension in Joomla Comunity, that will offer hugeness options for news articles displayment on front end page. Like said previously, this tool will be also available for free download soon and it will be available an specific HelpFile.

To avoid duplicate instructions for the News Show GK3 module, please check the respective HelpFile of this tool, available on _doc! folder package or download it from our free section Joomla!1.5 Tools.

News Show GK3 Module Instalation

On your Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select Extensions > Install/Uninstall.

Click the 'browse' button, select the module file inside the Modules folder *(mod_news_show_gk3.zip)* and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

News Show GK3 Module Configuration

In the demo template configuration, we use several News Show GK3 modules, each one with respective unique ID's. For detail information of the parameters used on this module, please read the respective HelpFile. You can also see each of the different modules configurations used on the demo by viewing the screenshots available on the DemoModulesConfigurations folder, inside of doc!!! folder. Also, if you use the QuickStart version of this template, you can see the respective configurations.

CORPORATE parameters configuration

You can change in template parameters by selecting the gk_corporate template on Template Manager. Navigate to "Extensions > Template Manager" and search for the CORPORATE template.

Press "edit" option and you be able to see the following parameters table.

Basic template parameters:

Template color:

Select default template color (blue - green - orange).

Column position width:

Set width for column position in pixels (i.e. 300)

Select column position:

Select column position on page - left or right.

Show mainbody on frontpage:

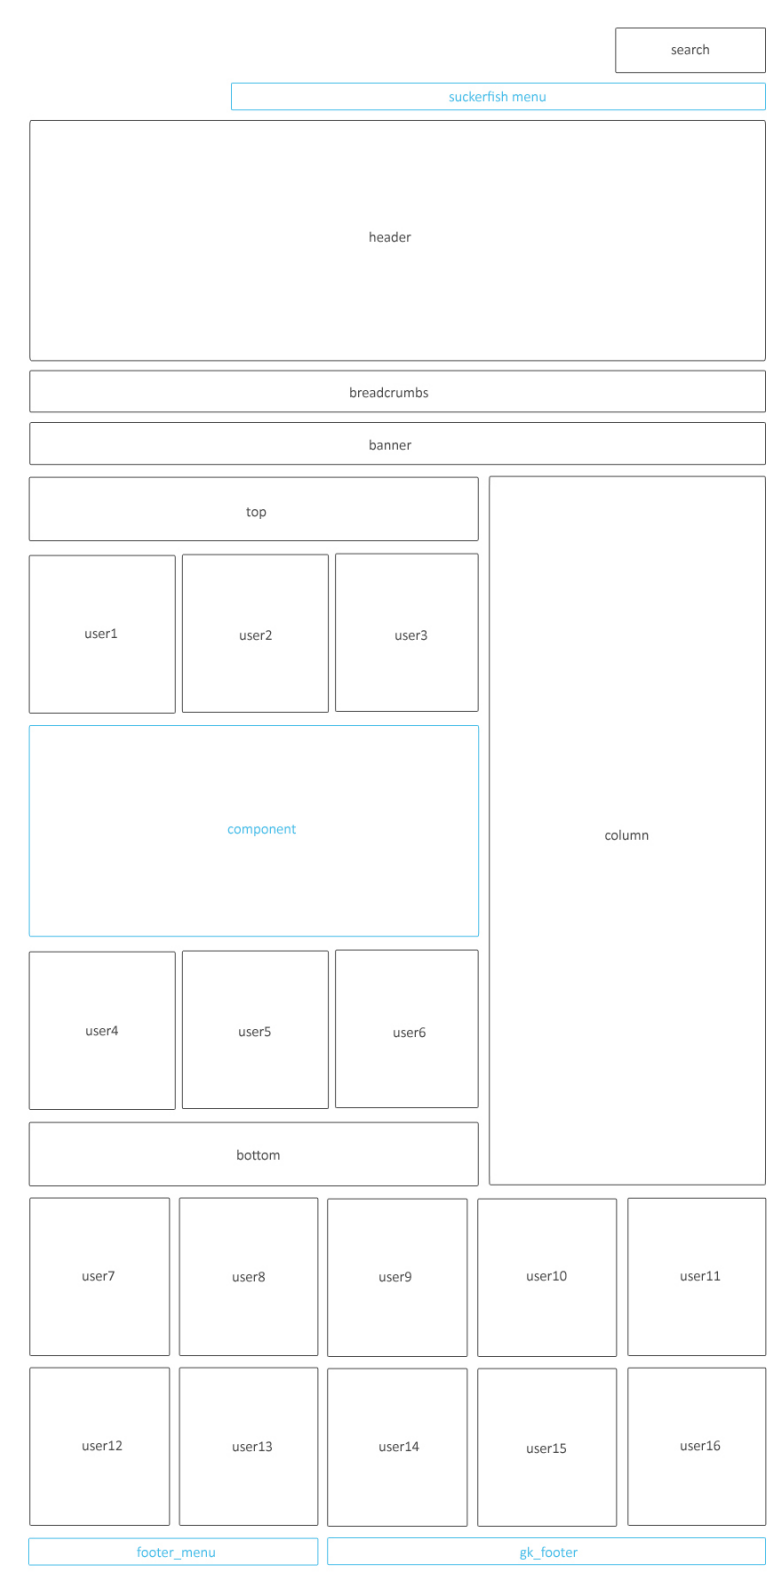
CORPORATE template supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right and the 'component' will fill the entire width.



By changing the CORPORATE template parameters you can set between user1 to user3 and also user4 to user6, a different module variation between light and grey style. The following screenshot are examples of both styles, using the News Show GK3 modules.

LIGHT Style
