

GK MOXMOVIES TEMPLATE *(for Joomla !1.5)*

Instructions Manual Installation:

Follow exactly the next steps:

Step 1:

Make a clean Joomla !1.5.4 installation on your website

Step 2:

Download from Gavick Commercial Download section the following files:

- moxmovies_pack_J!15.zip
- moxmovies_pack_J!15_demo_content.zip

Step 3:

Go to <http://www.joomitaly.com> and purchase the last JMovies Component 1.3 version.

Step 4:

Before starting the installation of the MoxMovies Template, please unpack the 3 files to your local computer.

Step 5 (IMPORTANT):

The MoxMovies Template is Joomla!1.5 native, but you must turn ON the Legacy Mode on Plugins Manager before begin your JMovies Component and modules files installation, because the present version 1.3 is only available for J!1.5 Legacy Mode.

Step 6: Enter to your Joomla Website browser Administrator, go to Extensions > Install/Uninstall and install the gk_moxmovies.zip file template.

Step 7:

Assuming that you already unpack the JMovies files, please go to Extension > Install / Uninstall and upload/install the following files:

- com_jmovies_v1.3.zip
- mod_jmovies_categories_v1.3_j1.5
- mod_jmovies_mootools_list_v1.3_j1.5
- mod_jmovies_pictures_scroll_v1.3_j1.5
- mod_jmovies_stats_v1.3_j1.5
- plg_search_jmovies_v1.3_j1.5

Step 8:

Install the PhotoSlide GK1 component available on "component" folder.

Step 9:

Inside the "modules" folder, unpack the gk_news_image_mox_pack.zip. Inside the folder generated, you will find the "install" folder (that's where are the plugins for this module) and the gk_news_image_1_mox.zip file (module). Go to "Extensions > Install/Uninstall" and select the gk_news_image_1_mox.zip and install.

Step 10:

Go to Extension > Install/Uninstall and install the News Show GK2 module.

(For more information about this module, please download our HelpFileManual from <http://tools.gavick.com>)

Step 11:

Navigate to Components > Gavick PhotoSlide GK1 and select the Plugins option:

(For more information about this Component, please download our HelpFileManual from <http://tools.gavick.com>)

- Install the 2 files that are inside "install" folder on News Image I module.
 - gk_news_image_1.php
 - gk_news_image_1.xml

After the plugin is installed, you must enable it

Step 12 *(Important!)*

Open the mod_jmovies_pictures_scroll.php file inside on modules directory and find this code:

```
<link href="<?php echo $mosConfig_live_site;?>/modules/mod_jmovies_pictures_scroll/
templates/<?php echo $params->get('template')?>/css/style.css" rel="stylesheet" type="text/css"/>
```

Erase it ! This will valid the gavick style for this modules.

Open the mod_jmovies_mootools_list.php file inside on modules directory and find this code:

```
<link href="<?php echo $mosConfig_live_site;?>/modules/mod_jmovies_mootools_list/
templates/<?php echo $params->get('template')?>/css/style.css" rel="stylesheet" type="text/css"/>
```

Erase it ! This will valid the gavick style for this modules.

DEMO CONTENT INSTALLATION:

We strongly recommend the sql content installation. Follow this next steps to install the sql demo content to set the template exactly as we show on our demo template page:

Step 1:

After downloading the moxmovies_pack_J!15_demo_content.zip and unpacked, you will find the following files and folders:

- images
- components
- db_content.sql

Step 2:

Upload both images and components folders to your joomla website respective directory.

Step 3:

Go to your website cpanel and enter on MyPhpAdmin (provided by your host server) and select your joomla website database.

Step 4:

After you select your databse, press "import" option, search our sql_content.sql and import this file. If the importation process was ok, you be able to see the sucessfull message on the board.

Step 5:

Return to your Joomla Administrator and login using the following:

Username: admin

Password: demo

(You can change it to your own login values after this)

Step 6:

After you enter you administrator browser, navigate to "Components > JMovies" and enter on configuration option > frontend. Set "Template" to moxmovies_J1.0 option and save.

.

That's it !

Your Gk MoxMovies J!1.5 Template is ready!
