- » Delivered with source Adobe .PSD files.
- » Delivered with "QuickStart Package"

MUSICTUBE - Overview files

After downloaded all the files available on our exclusive MemberShip commercial section and also some files that are available on our free tools section, let´s see a brief overview inside the MUSICTUBE package release. Since some tools used on this template have their own HelpFile, we will give you here the major orientation guide to make your installation. For further details about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

[So, here's a brief overview of the files available inside the "MUSICTUBE" Template pack release.](#)

You downloaded the following 2 compressed files:

- » **gk_musictube_J!15.tgz** - This is the template file installation.
- » **gk_musictube_J!15_rest_files.zip** "Before running... please unpack the .zip pack file."

The "gk_musictube_J!15_rest_files" folder witch contains the following files:

- » **_doc!!!** "folder"

Here's the present Instructions Manual, the PhotoSlide GK2 Component, Tabs Manager GK2, News HighLighter GK1 and also the News Show GK3 HelpFiles. You can also find this Manuals inside the respective package tools.

- » **_quickstart!!!** "folder"

The MUSICTUBE comes along with a QuickStart package version installation.

- » **Modules** "folder"

GK News Show Pro GK1 module (*mod_news_pro_gk1.zip*) - This is a new News Show module, a version derived from the original News Show GK3. You can find further information ahead (**Installation: use the Joomla Installer**).

Gavick Embed Media module (*GK_Embed_Media_1.0.zip*) - This module displays external media players like for example Youtube, Vimeo and all others that provide public their embed source code (**Installation: use the Joomla Installer**).

- » **plugin_for_photoslide** "folder"

GK News Show Pro GK1 plugin (*plg_news_pro_gk1.zip*) - This is an optional and extension for the News Show Pro module and it must be installed on the PhotoSlide GK2 component. With this plugin, you be able to create group images to be displayed on the module with the respective articles set on each image group (**Installation: use the Component Installer**).

- » **Source** "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design.

blue.psd - maroon.psd - pink.psd - all_layers_with_slices.psd

Notice!! The font type used on the source files are not provided with the Template package, because they may have copyrights reserved.

IMPORTANT!!!

Other files necessary and not available on package.

To complete the necessary files, you must download from our free tools section the following files (go to <http://tools.gavick.com> or to <http://www.gavick.com/downloads-area/>):

» PhotoSlide GK2 component package (Unpack first!).

There you will find the component and also the following new files for this template (they are located here, because it will be available for free download).

GK News Image VI module (*mod_news_image_6.zip*) - this is the new module for slide news show for the photoslide component (Installation: use the Joomla Installer).

GK News Image VI plugin (*plg_gk_news_image_6.zip*) - this is the necessary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the module (Installation: use the Component Installer).

» Tabs Manager component package (Unpack first!).

Here you can find this following files needed.

GK Tabs Manager GK2 component (*com_gk2_tabs_manager.zip*) - this is the component file (Installation: use the Joomla Installer).

GK Tabs Arts GK2 plugin (*plg_tab_arts_gk2.zip*) - this is the necessary plugin to be installed on the Tabs Manager GK2 component, allowing the creation of groups for displayment on the module (Installation: use the Component Installer).

GK Tabs Arts GK2 module (*mod_tabarts_gk2.zip*) - this is the module to front end display of articles (Installation: use the Joomla Installer).

» News Show GK3 module package (Unpack first!).

Here you can find this following files needed.

GK News Show GK3 module (*mod_news_show_gk3.zip*) - this is the module (Installation: use the Joomla Installer).

GK News Show GK3 plugin for PhotoSlide GK2 (*plg_news_show_gk3.zip*) - this is the necessary plugin to be installed on the PhotoSlide GK2 component, allowing the creation of groups for displayment on the News Show GK3 module (Installation: use the Component Installer).

» News HighLighter GK1 module package (Unpack first!).

Here you can find this following files needed.

GK News HighLighter GK1 module (*mod_gk_news_highlighter.zip*) - this is the module (Installation: use the Joomla Installer).

After you get this files, please unpack first and use them when needed, as we explain in next chapters.

Here are some recommendations that you should considerate and might help you.

Are you new in Joomla? If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System) and visit the oficial support forum of www.joomla.org for any problem direct related. Nevertheless, we will be happy to help you if possible in our support forum.

Building a new Joomla Website ? If you are building a new website and if you like our demo, we strongly recommend you to use the QuickStart version and from them, change it to your own content and configuration.

Get quick acquaint with MUSICTUBE ! In all cases, if you are a new or already experience user, we recommend that you install a experimental version, using free popular local server like XAMPP or WAMP (you can find easily information on internet about this excellent tools for website development) or if you wich, an online test installation. This way, you be able to fit in more fast and easier way in some configuration tools, modules positions and other particular details that you need to know.

You already have a website and want to use this template ? If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla (present version - J!1.5.9). If not, please upgrade to insure total compatibility with our template and tools. Naturally, if this is your case, you must install all files individual, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version still is an important ally to help you. Just remember the previous recommendations.

Do you have some problems with our tools ? Some usual problems reported on our support forum are originated from script conflict with 3th party tools. If you know Joomla suficient enough, you already know that there is a huge amount of solutions and extensions available for free or some commercial from other team or developers. Naturally, you will search others extension to complete some particular funcionality and your website needs, but understand that we are responsable only for our template and tools; and we cannot guarantee that all 3th party extensions will work perfectly with our template or tools. So, it is your hands and it is your responsibility to choose those extensions on Joomla Community. Anyway, you always can ask for support in our forum and if is possible, we will try to help you.

Another usual problem reported in our forum, is related with permissons on files and directory. Some tools need that some specific files are set with rewrite or read permissions, so you can find some problems if you don't have this permissions set. Take note that we cannot control your server security configuration, but we can point you directions were you must change this permissions. If you are unable to change it, we recommend that you contact your host server provider.

Keep always updated! We strongly recommend that you visit us regularly on update.gavick.com, were you can see the latest updates of our templates, components, plugins and modules. If you have any problem, be sure the solution is not already available and you will avoid waste time searching or asking for solutions in our forum support.

Need some small CSS style customizations adjustments? You can always request some support from our Moderators or Developers, but you need to take in mind that this is customization and not regular support service. We are considering in the future to create personall customization and installation services support for those who need it. The Developer MemberShip is excluded, since this service is already available for this subscription. Nevertheless, we will always available to try to help you.

If you have some experience in CSS styling, we strongly recommend the use one of the most powerful tool for WebDesigners, available for free in FireFox browser - The [FireBug](#) addon - a perfect ally and work tool.

What is the better way for me to place a problem in the support forum? If you need help in some issue, please post it in our forum support in the most objective way, preference in english language and with an URL to show us the problem. This way, we will be able to give you the needed help in faster way.

Need to contact Us? Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply to you as soon as possible.

MUSICTUBE QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediatly of all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files needed. It will set your joomla website exactly as we show the **MUSICTUBE** Template in our demo.gavick.com.

Again, we invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respetive tools. So, keep in touch on update.gavick.com.

Sugestion!!!

You can easily get acquaint of the MUSICTUBE template environment, by making some local tests, using a local server like (i.e. XAMPP or WAMP Servers) or others available for free in the internet. By installing this local servers, you be able to install, run and test easily all the potencial of this template without any problems. This make all the difference and we garantee you that will avoid wasting time by searching our support forum, when the answer is already available on the QuickStart version.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

Installation Steps for the QuickStart!!! version :

Step 1) Unpack the compressed file QUICKSTART_FEB2009.zip inside of the _quickstart!!! folder and upload all the content inside of the QUICKSTART_FEV2009 folder to your clean website directory. You will notice that this files are similar to a normal Joomla!1.5 package. That's because it's like a normal joomla installation.

Step 2) Create a new database using MyphpAdmin that you should have it installed in your cpanel website.

Step 3) Make a normal Joomla J!1.5 installation steps using the upload files. **Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.**

Step 4) MLike a normal joomla installation, you must delete or rename your "installation" folder in your new website installation.

Step 5) After ending the installation, enter in the Administrator using Username "admin" and password "demo" *(Naturally, you can change this values after!!!).*

That's it! Easy, was not? Of course it was.

If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and make guidance use of our tools configuration.

MUSICTUBE Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further details information, we prepare the following short step by step task list for the MUSICTUBE installation.

- » **Step 1** - Install the **MUSICTUBE** template (*gk_musictube_J!15.tgz*) using the Joomla Installer.
- » **Step 2** - Go to the Templates Manager and set the “**gk_musictube**” template to default.
- » **Step 3** - Using the Joomla Installer, install the **PhotoSlide Gk2** (*com_gk2_photoslide.zip*) component.
- » **Step 4** - Go to the PhotoSlide GK2 administration (**do not use the joomla installer!!!**), select “plugins” menu and install the **Gk News Image VI** plugin (*plg_gk_news_image_6.zip*), the **News Show GK3** plugin (*plg_news_pro_gk1.zip*) and the **News Show Pro GK1** plugin (*plg_news_show_gk3.zip*). **Don't forget to enable this plugins!!!** You now can start working by creating your slide groups on the PhotoSlide GK2 administration.
- » **Step 5** (Optional) - Go to the PhotoSlide GK2 administration, select “Extensions” menu and install the **Rainbow Extension** tool (*ext_rainbow.zip*) and the **EasyLinks Extension** (*ext_easylinks.zip*). Don't forget to enable this extension, if you want to use it.
- » **Step 6** - Go the Joomla Installer! and install the **Gk News Image VI** module (*mod_gk_news_image_6.zip*).
- » **Step 7** - Using the Joomla Installer, install the **Tabs Manager GK2** (*com_gk2_tabs_manager.zip*) component.
- » **Step 8** - Go to the Tabs Manager GK2 component (**do not use the joomla installer!!!**), select “plugins” menu and install the **Plugin Tabs Arts GK1** (*plg_tab_arts_gk2.zip*). **Don't forget to enable this plugin!!!** You now can start working by creating your tabs groups on the Tabs Manager administration.
- » **Step 9** - Using the Joomla Installer, install the **Tabs Arts GK2** module (*mod_tabarts_gk2.zip*).
- » **Step 10** - Using the Joomla Installer, install the **Gk Embed Media** module (*GK_Embed_Media_1.0.zip*).
- » **Step 11** - Using the Joomla Installer, install the **Gk News HighLighter GK1** module (*mod_gk_news_highlighter.zip*).
- » **Step 12** - Using the Joomla Installer, install the **News Show GK3** module (*mod_news_show_gk3.zip*).
- » **Step 13** - Using the Joomla Installer, install the **News Show Pro GK1** module (*mod_news_pro_gk1.zip*).
- » **Step 14** - With all previous 9 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

- Delivered with "QuickStart Package"

[View Musicube in live demo](#)

After the template is successful installed, you must set it as your default template. To do that, navigate to [Extensions](#) > [Template Manager](#) and set it as your default Joomla! template.

With the template installed, next we are going to explain how to install the other files needed (components, modules and plugins).

PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the _doc! folder package.

You need to download this package from our free tools download section on www.gavick.com and then unpack first this file.

Using the Joomla Installer, search for the `com_gk2_photoslide.zip` and select “upload and install”

A message will appear saying “Upload Component - Success” and it will show you an overview of the template. Then select “Continue”...

Gk News Image VI Plugin Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

The process installation of the plugin is exactly the same as stated on the HelpFile.

Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator do install any plugin or extension available.

So, navigate to the PhotoSlide GK2 administration, select “plugins” option and choose “Install Plugin”. Then search the `plg_gk_news_image_6.zip` file locally and click “Save” on right menu.

If all goes well, you should be able to see the plugin successful installed, like the following screenshot indicates.

Groups | **Plugins** | Extensions | Check system | Help | Info | GavickPro News

Plugin has been installed successfully

#	ID	Status	Name	Description	Type	Version
1	1	<input type="checkbox"/>	GK News Image VI	XML file for module Gavick News Image VI	module	1.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

Photoslide GK2 - Plugins

Back Install plugin **Enable Plugin** Disable plugin Delete Help

Selected plugins has been enabled

#	ID	Status	Name	Description	Type	Version
1	1	<input checked="" type="checkbox"/>	GK News Image VI	XML file for module Gavick News Image VI	module	1.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let’s see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk News Image VI is no exception to this rule. So, select the “Groups” option and click on “Add Group” option. As we only have one plugin installed, this will be assume by default on the group creating process.

Photoslide GK2 - Add group

Back Save Close Help

Groups Plugins Extensions Check system Help Info GavickPro News

You have only one enabled plugin so this plugin was automatically selected for this new group

Group name:

Images quality (0-100): %

Image width: px

Image height: px

Thumbnail width: px

Thumbnail height: px

Background color:

Title color:

Text color:

Link color:

Hover link color:

The following parameters are the ones that you will need to set on the group configuration:

Group name:

For identification of the group, that will be necessary on the module configuration.

Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most possible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

Image width and height:

Set image width and height in pixels.

Thumbnails width and height:

Set thumbnails width and height in pixels.

Background color:

Color value in hex format for background (i.e. #FFFFFF).

Title color:

Color value in hex format for Title (i.e. #FFFFFF).

Text color:

Color value in hex format for text (i.e. #FFFFFF).

Link Color:

Color value in hex format for Link text (i.e. #CCCCCC).

Hover Link color:

Color value in hex format for Hover Link user event effect (i.e. #000000).

Group name:	Header 1
Images quality (0-100):	90 %
Image width:	459 px
Image height:	160 px
Thumbnail width:	140 px
Thumbnail height:	60 px
Background color:	#000000
Title color:	#FFFFFF
Text color:	#AAAAAA
Link color:	#CCCCCC
Hover link color:	#EEEEEE

Example configuration used on the demo template group.

After all parameters are set, save it and the group is ready to receive slides.

Adding Slides to Group configuration

Let us now see how to add slides to the group.

First, open the "Groups" panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the "Add slide" button and set the following parameters.

Photoslide GK2 - Add slide

[Groups](#)
[Plugins](#)
[Extensions](#)
[Check system](#)
[Help](#)
[Info](#)
[GavickPro News](#)

Name:	<input type="text"/>
Image:	<input type="text"/> <input type="button" value="Procurar..."/>
Access level:	<input type="text" value="Public"/>
Title:	<input type="text"/>
Text:	<input type="text"/>
Link type:	<input type="text" value="Article link"/>
Link value:	<input type="text"/>
Article:	<input type="text" value="Example Pages and Menu Links"/>
Wordcount:	<input type="text" value="30"/>
Image stretch:	<input type="text" value="Don't stretch image"/>

Name:

Set the name of the slide.

Image:

Select the source image slide for uploading purpose.

Access level:

Set level access for image display (public, registered or special).

Title:

Set news title for module displayment.

Text:

The text of the slide to be show on the module display *(if you choose bellow your own title and text display)*.

Link type:

Set if you want your own link or the link of an existent article.

Link value:

If you choose previously your own link type, set it here or leave it blank if you didn't *(ex. http://mylink.com)*.

Article:

If you choose an article link, set it here or leave the "Your own title and text" set.

Word Count:

Set the number of words to be display on the slide from the article or from your text.

Image stretch:

If you have an image smaller or bigger from the module display option, choose "Stretch image" and this will automatically reset the image dimensions to fill totally the module. This option may withdraw some quality image if the same have some dimension not proportional from the module. If you have a image with same dimension set on the module, set it "Don't stretch image" option.

#	ID	<input type="checkbox"/>	Slide name	Published	Access level	Preview	Settings	Order
1	31	<input type="checkbox"/>	Slide-1	✓	Public	Preview	Settings	<input type="text" value="1"/>
2	32	<input type="checkbox"/>	Slide-2	✓	Public	Preview	Settings	<input type="text" value="10"/>
3	33	<input type="checkbox"/>	Slide-3	✓	Public	Preview	Settings	<input type="text" value="11"/>

8	38	<input type="checkbox"/>	Slide-8	✓	Public	Preview	Settings	<input type="text" value="16"/>

Tip: You can click button "Settings" to show setting of selected slide

Screenshot of the group created for the demo template.

After all slides are set on the group, you can see the general content and making use the AJAX setting preview option, you can easily preview all parameters of each slide and also preview the image for purpose display.

News Image VI module installation

Using the **Joomla Installer**, from the top menu select **Extensions > Install/Uninstall**. Click the 'browse' button, select the News Image III module file (*mod_gk_news_image_6.zip*) and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' them select "Continue..."

News Image VI module configuration

After successful module installation, from the top menu, go to **Extensions > Modules Manage** and enter in panel configuration of the module. Set the module in the header position and enable it. Before you save it, you must configure the following parameters fields.

Module parameters:

Module Class Suffix:

A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

Module unique ID:

Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newsimage1).

Slides group:

Group with slides (*if list is blank then it means that you must add at least one group in Photoslide GK2*).

Module background color:

Set the module background color in Hex value or leave blank if for transparent.

Text block height:

Set text block height (i.e. 120).

Show text block:

Enable this option if you want show article content linked with slides.

Text block opacity:

Opacity of text block - must be float between 0 and 1 or integer - 0,1 (i.e. 0.45).

Text block background:

You can select default background from group settings or your own value.

Text block background color:

If you select in previous option your own value - this value must be in hex format (i.e. #000000).

Clean XHTML:

Enable or disable clean XHTML.

Readmore button:

If you want to show readmore button.

Readmore button text:

Text for readmore button (i.e. Read more).

Title as link:

You can enable link in header of article in text block.

Tab title limit:

Max. amount of chars in title in tab.

Tab text limit:

Max. amount of chars in text in tab.

Width of tabs block:

Width of block with tabs in pixels (i.e. 300).

Thumbnails amount:

Number of thumbnails to display (i.e. 10).

Amount of tabs per page:

Amount of tabs which will be visible at start.

Thumbnails margin:

Set thumbnails margin (i.e. 5).

Thumbnails position:

You can select position of thumbnails. Options: right - left.

Tabs margin:

Set bottom margin for each tabs.

Slide animation speed:

Speed for animation effect in ms (i.e. 1000).

Animation interval:

Interval between slides in ms (i.e. 5000)

Autoanimation:

Enable if you want to start animation automatically

Slide animation type:

Select your slide effect for the module.

Text animation type:

If you want to enable opacity effect for text.

Preloading:

Turn on preloading process.

Screenshot of the module parameters set for the demo template.

Parameters

▶ **Module Parameters**

▼ **Advanced Parameters**

Clean template code	Enabled ▼
Use MooTools	Automatic ▼
Use script	Automatic ▼
Use compressed engine	Enabled ▼

Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

Use script:

In normal situations, option "automatic" is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

Use compressed engine:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionally - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

News Show Pro GK1 Module

Here's a new version of News Show module, a derivative version from the original one that will offer you new and hugeness options for news articles displayment on front end page. Like said previously, this tool will be also available for free download soon and it will be available an specific HelpFile. But for now, we add this major orientation to how work with it.

News Show Pro GK1 Module Instalation

On your Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the module file inside the Modules folder (*mod_news_pro_gk1.zip*) and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

The screenshot shows the Joomla! Extension Manager interface. At the top, there's a navigation bar with 'Install' selected. Below it, a blue banner displays 'Install Module Success'. The main content area has three sections: 'NEWS PRO INSTALLED CORRECTLY', 'Upload Package File' (with a 'Package File' input field and 'Procurar...' and 'Upload File & Install' buttons), 'Install from Directory' (with an 'Install Directory' input field and an 'Install' button), and 'Install from URL' (with an 'Install URL' input field containing 'http://' and an 'Install' button).

Now that the News Show GK3 is available on your Modules Manager, let's take a look inside of the module configuration and see what's able to do.

News Show Pro GK1 module configuration

From the top menu, navigate to select “[Extensions](#) > [Module Manager](#)”, find the News Show Pro GK1 module on the available list and click on it to edit the module configuration.

Module parameters:

By entering in the module, set it in your respective position and enable it. Before you save it, you can configure the following parameters fields.

Module Class Suffix:

A suffix to be applied to the css class of the module (table.moduletale), this allows individual module styling.

Module unique ID:

Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newspro1).

Main block width:

The width of main articles block. It must be always integer value (in pixels) (i.e. 400).

Links block width:

The width of links block. It must be always integer value (in pixels) (i.e. 300).

Table cell padding:

Set padding for table cells. Add px or % suffix ! (i.e. 3px).

Section:

Section which will be source of news headings.

Category:

Category which will be source of news headings.

Sections:

Sections which will be source of news. IDs separated by comma... (i.e. 2,5).

Categories:

Categories which will be source of news. IDs separated by comma... (i.e. 3,5)

Module mode:

In category mode links are connected with main articles. Main articles and links have always one page (amount of pages depends on amount of categories). In category mode field ID's will not work !

Amount of articles pages:

Max. amount of articles pages. (it works only in standard mode).

Amount of links pages:

Max. amount of links pages. (it works only in standard mode).

Amount of columns:

The amount of columns in one table with main articles (columns per page)...

Amount of rows:

The amount of rows in one table with main articles (rows per page)...

Links amount:

Amount of links per page (in category mode - amount of links per one category).

News sort value:

Value to sort in database by Date, Order, Random, Frontpage order and Hits.

News sort order:

Order of sort in database by ascending or descending.

Showing frontpage articles:

Enable it if you want to show frontpage articles.

News text limit type:

Set here the text limit type, by words or characters.

Maximal amount of words or characters:

Value of words or characters to be display for each news.

Maximal amount of characters in title:

Set value of characters to be display in the news title.

Max. amount of chars in list element title:

Set value of characters to be display in the list links title.

Max. amount of chars in list element text:

Set value of characters to be display in the list links text.

Clean (X)HTML in content:

If you load part of news content then we recommend to turn ON this option.

News date - timezone:

Select how many hours must be added/substracted from your time server.

Plugin support:

If you want to use images from Photoslide in module. Enable ONLY if you have installed Photoslide GK2 Component and News Show GK3 plugin installed and enabled (*see respective chapter*).

Use only plugin images:

If you want to use only images in the module from Photoslide GK2 group created with the News Show GK3 plugin.

News image height:

Set height value of the image. Add px or % suffix ! (example 100px). If you leave this value as "0", the original image height will be assumed.

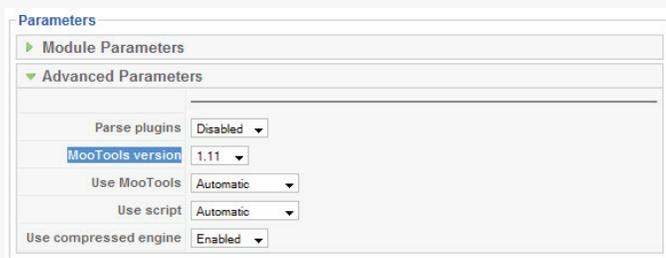

News image width:

Set width value of the image. Add px or % suffix ! (example 100px). If you leave this value as "0", the original image width will be assumed.

News image margin:

The margin of the news image. Add px or % suffix ! (i.e. 3px)

Module advanced parameters:

Parse plugins:

If you want to enable parsing plugins in article content - please enable this option.

MooTools version:

Select MooTools version which will be used in module.

Use Mootools:

Now modules support new technique of assets JavaScripts files.

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on one page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site then disable this option.

Use script:

Now modules support new technique of assets JavaScripts files. In other situations option automatic is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on one page then set this value for disabled.

Use compressed engine:

To minimalize filesize you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option).

Additionally - when you use more than one copy of this module per one page then you must set this same value of this option for all instances of module.

Some considerations for Image display using the plugin for the PhotoSlide:

- » By enable plugin support in the module and if you want to display the images and sizes configurations setted on PhotoSlide group, them you must leave the "width" and "height" fields in the module with "0" value. If you set on this fields different values from "0", them the image size will be display and it's source will be from image articles and NOT from images setted on PhotoSlide GK3 group.
- » Also, when you enable the plugin support, with the respective list of news configurated to be display on the module, some mixed with those from the group, if you leave width and height "0" values, the ones not selected on PhotoSlide will display the first image of the article with default image size.
- » The plugin creates the possibilty to use different image dimensions in each image connected to articles.

"- So Why should I use the News Show Pro Plugin ?"

- » The plugin can be essential to optimize the cache loading time of your internet page, in case you need to use large amount of module and number of article with image display. Basically, we mean that by default the News Show Pro will display a resized image from joomla content and not create (for know) real thumbnails with smaller weight. By using this tool, you can display a different and smaller image by creating a specific group on PhotoSlide GK2 with each image related to respective article. So, with this tool you will be able to speed up you page loading and also, gives you another important tool to stylish differently your front end articles announcements. In MUSICTUBE demo template, we use (and abuse) this option so we could show less cache loading.
- » Next we will show you how you can install and use the News Show Pro plugin for PhotoSlide GK2.

Using News Show Pro GK1 plugin

Like explain before, this is a great extension for optimization of News Show Pro GK1. This will give you the possibility to work in partnership with our PhotoSlide GK2 component.

News Show GK3 plugin Installation

The installation process for this plugin on the PhotoSlide GK3 is very similar from the one that we provide for News Show GK3 package. So, basically you must enter in the PhotoSlide GK2 administration panel (again, please don't use the Joomla Installer in this step), select the "Plugins" option, use the "search" field and select the `plg_news_pro_gk1.zip` file located on your computer. Upload this file and enable it.

You should see the following screenshot on the PhotoSlide > Plugins panel.

#	ID	Status	Name	Description	Type	Version
1	1	<input type="checkbox"/>	GK News Image VI	XML file for module Gavick News Image VI	module	1.0
2	2	<input checked="" type="checkbox"/>	News Pro GK1	XML file for module News Pro GK1 v.1.0.0	module	1.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

Add Group in PhotoSlide GK2 for News Show Pro GK1 module

Create a group on the PhotoSlide GK2 component administration, by selecting the News Show GK3 plugin. The process is exactly the same like we explain in the HelpFile PhotoSlide GK2.

Navigate to Components > Gavick PhotoSlide GK2 and press on the right menu the "Add Group" button.

Select the News Show Pro GK1 plugin available on the right side. If you have only this plugin installed, naturally it will be chosen by default.

Set the following parameters on the configuration of the group, provided by the News Show Pro GK1 plugin (*the values are only examples*).

Groups Plugins Extensions Check system Help Info GavickPro News	
Group name:	<input type="text" value="News Show Pro Den"/>
Images quality (0-100):	<input type="text" value="75"/> %
Image width:	<input type="text" value="0"/> px
Image height:	<input type="text" value="0"/> px
Thumbnail width:	<input type="text" value="0"/> px
Thumbnail height:	<input type="text" value="0"/> px
Background color:	<input type="text" value="#000000"/>

Group name:

Give a name to your group for ID.

Image quality:

With this option, you still have possibility to decrease the weight of each image to display.

Image width:

Set image width (without px).

Image height:

Set image height (without px).

Thumbnail width:

Set thumbnail width (without px).

Thumbnail height:

Set thumbnail height (without px).

Background color:

Set background color in hex format (i.e. #000000)

Add Slide for News Show Pro GK1 Group

Finished the creation of the group, the process of adding slide to the group it's the same.

Navigate to the groups panel on the PhotoSlide GK2 administration and press "Add Slide" option. You will need to set the following parameters fields, but with some exceptions to considerate that i will next explain.

Groups Plugins Extensions Check system Help Info GavickPro News	
Name:	<input type="text" value="Image 1"/>
Image:	<input type="text"/> <input type="button" value="Procurar..."/>
Access level:	<input type="text" value="Public"/>
Article:	<input type="text" value="What happened to the locale setting?"/>
Image width:	<input type="text" value="0"/> px
Image height:	<input type="text" value="0"/> px
Thumbnail width:	<input type="text" value="0"/> px
Thumbnail height:	<input type="text" value="0"/> px
Image stretch:	<input type="text" value="Don't stretch image"/>

Name:

The name that you want to give to your slide (*just for your orientation*).

Access Level:

This is a nice option that you can set, by selecting the level access for each news image article.

Image Width:

Image Height:

Thumbnail width:

Thumbnail height:

Notice that in the screenshot above, this fields are set with "0" value. That's because image size which is set in module is connected with images from articles and not from Photoslide. By setting values here, will be usable when you need in the News Show Pro GK1 module diferent size image display.

Article:

Here's the sniper for the article.

Image stretch:

Stretch option that generates images that will ajust setted dimensions.

Tip! You can can create different images for articles for different access levels.

WARNING!!! It is very important to have set **ONLY** one image in Photoslide connected with one article - if you set more images connected to same article, most probally will cause some problems. The only exception is when is created with diferent level access.

If you return to the News Show Pro GK1 module administration, were you want to use the group images cretaed, you must configurate it in order that the news articles that will be displayed are the ones that you chose on PhotoSlide GK2. Also, be sure to enable the use of the plugin support on the module.

News Show GK3 Module and Plugin

To avoid duplicate instructions for the News Show GK3 module, please check the respective HelpFile of this tool, available on `_doc!` folder package or download it from our free section Joomla!1.5 Tools.

You will notice that the process and configurations are very similar to the new News Show Pro GK1.

If you have any doubt, we remind that you can always visit us on the official forum support.

Tabs Manager GK2 and Tabs Arts module

Again, to avoid duplicate instructions for the Tabs Manager GK2 component and Tabs Arts module, please check the respective HelpFile of this tool, available on `_doc!` folder package or download it from our free section Joomla!1.5 Tools.

News HighLighter GK1 Module

Also, please check the respective HelpFile of this tool, available on `_doc!` folder package or download it from our free section Joomla!1.5 Tools.

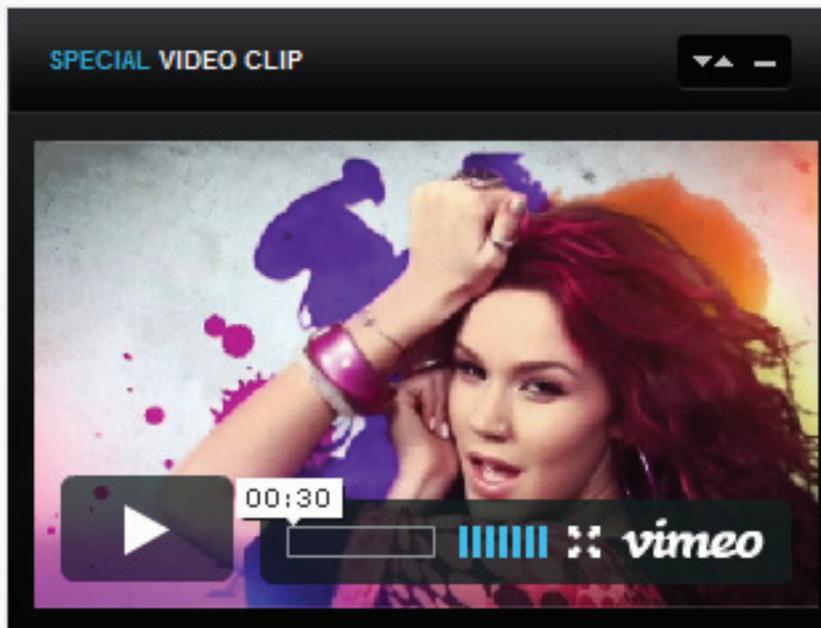

GK Embed Media 1.0 Module

With this great module, you can place your favorite MoviesClips working with direct links media source from YouTube, Google Videos, Daily Motion, Metacafe, Vimeo and others well known Media Source Websites.

You can also display custom flash clips using the Advanced Configuration on the module panel.

Make the eyes and hears of your viewers bump from explosive content.

Module Instalation

Using the Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the module file inside the Modules folder (*mod_gk_embed_media.zip*) and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

Gk Embed Media Module Configuration

After successful module installation, from the Menu go to [Extensions](#) > [Modules Manage](#) and enter in panel configuration. Start by the Basic Module [Parameters](#) by configuring the following fields:

Module parameters:

Module Class Suffix:

Provides the possibility of set a css class that allow's individual module style.

Module unique ID:

Set here the unique ID of module. You can use more than one module on your Joomla! 1.5.3 website. For each one, this ID must be different.

Media URL:

Here you must place the URL of the flash movie if Media Source Provider is available on the Drop Down Media Source Menu. (*YouTube Example direct link: http://www.youtube.com/watch?v=VIDEO_ID*). This URL will be automatically changed to http://www.youtube.com/v/VIDEO_ID for the engine module script.)

IMPORTANT! In Revver and Viddler Media Players, instead of URL as file ID, you must set as ID only the identification of the file. Example for a Viddler Media File URL: [\[viddler id=VIDEO_ID&w=437&h=288\]](http://www.viddler.com/v/VIDEO_ID&w=437&h=288) the ID must only be the VIDEO_ID value and NOT THE LINK.

For all available Media Source Players, the process is the same by setting the direct URL from the video flash.

Player width:

The width of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player width.

Player height:

The height of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player height.

Media Source:

List of Media Source available.

IMPORTANT!!! If your Media Source Player is not available on this menu, you must choose "Other (...)" option and next on the Advanced parameters, you must set the embed code, as we are going to show you in the following explanation.

By selecting one available Media Player on the Module Parameters, you may change it's configuration on each Player. Naturally, if you pick the YouTube Media Player, the rest of the parameters from others are indifferent.

Each Media Player provide us the possibility to set some different configurations, like size player or the Related Videos Option.

The final field "Advanced configuration of other player" is needed if you choose in Module Parameters a different Media Source Player, different from the available ones. Here you must place the code of the flash media URL

Please, take note of this important notices:

- » For Daily motion player options WIDTH and HEIGHT doesn't works - We provide 3 sizes for the player size.
- » Like we said before, other player option means every player which can be added by embed tag. So if you don't know how the correctly code of the embed file, them we recommend you to drop this option and select a available Media Player.

The screenshot shows the 'Parameters' section of a Joomla! module configuration. Under 'Module Parameters', there are fields for 'Module Class Suffix' (set to '_clear'), 'Module unique ID' (set to 'gk_embed_media'), 'Media URL' (empty), 'Player width' (set to '0'), 'Player height' (set to '0'), and 'Media source' (set to 'Other(metacafe, vimeo, flickr)'). There is also an 'Advanced Parameters' section which is currently collapsed.

This screenshot shows the 'Advanced Parameters' section for the media player. It lists various options for different media sources:

- YOUTUBE:** Show related videos, Show player border, Select player style, Color 1, Color 2.
- GOOGLE VIDEO:** Allow fullscreen.
- VEOH:** Allow fullscreen, Player background.
- DAILY MOTION:** Daily motion player size, Allow fullscreen.
- Player background color, Player glow color, Player foreground color, Player special color.**
- Video autoplay, Show related videos.**
- REVVER:** Allow fullscreen.
- VDDLER:** Allow fullscreen, Video autoplay.
- Player type:** Simple player, Default player.
- OTHER:** A text area for custom embed code, containing a complex HTML/Flash embed tag for a video player.

» **VERY IMPORTANT!!!** If you insert a public media player code that it is provided by the source media, you need to add the `wmode="transparent"` parameter to avoid overflow with the template display.

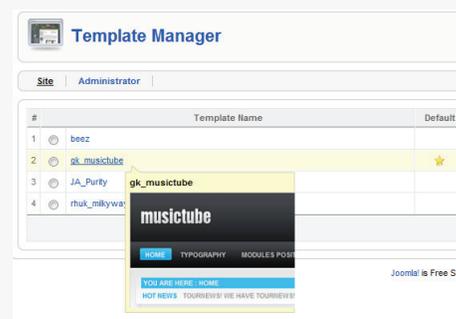

» **VERY IMPORTANT!!!** Also by entering the source code of the stream media player, you must replace all "&" character with "&". This will avoid some XHTML / CSS code errors on your front end.

13 Template Parameters

MUSICTUBE parameters configuration

You can change in template parameters by selecting the gk_musictube template on Template Manager. Navigate to Extensions > Template Manager and search for the MUSICTUBE template.

Press “edit” option and you be able to see the following parameters table.

Basic template parameters:

Template color:

Select default template color.

Background color:

Select default background color.

Header position width:

Set width for header position in pixels (i.e. 732)

Column position width:

Set width for header position in pixels (i.e. 312)

Column position:

Set column left or right position.

Show mainbody on frontpage:

Enable/disable the mainbody on frontpage.

Interface parameters:

IE6 alert:

Show information when user use IE6.

Text “Your are here”:

Enable this option if you want to show text ‘You are here’ before breadcrumbs.

Scalable font size:

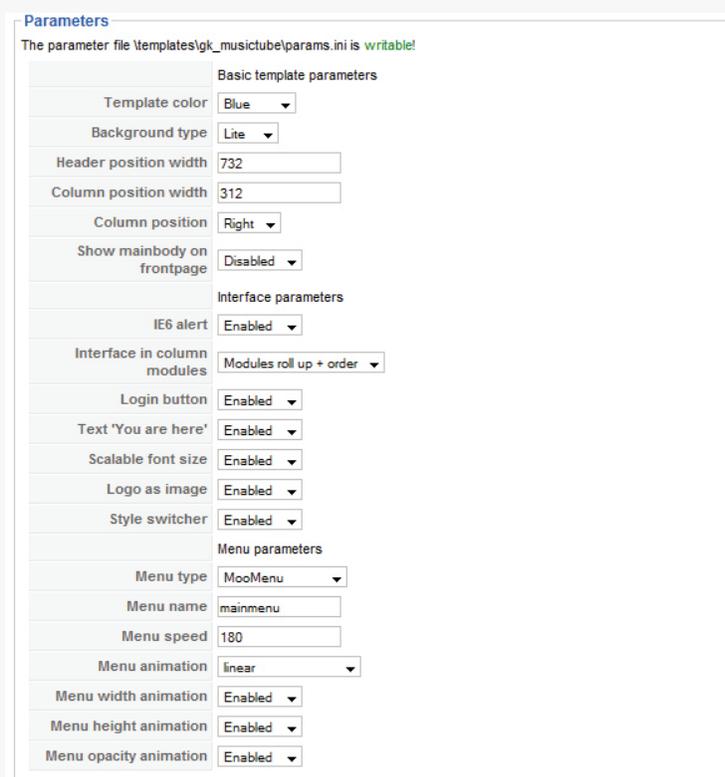

Enable additional buttons to increase/decrease/reset font size.

Logo as image:

If you want to have normal image instead of link with background - enable this option. **IMPORTANT:** when you enable this option, style change won’t change your logo till page refresh.

Style switcher:

Enable this option if you want to enable style switcher.

Menu parameters:

Menu type:

Select the main menu type to by use on the frontpage.

Menu name:

Identify the ID of the menu for display.

Menu speed:

Set speed menu animation.

Menu animation:

Set type of menu animation transition effect.

Menu width animation:

Use animation width in menu.

Menu height animation:

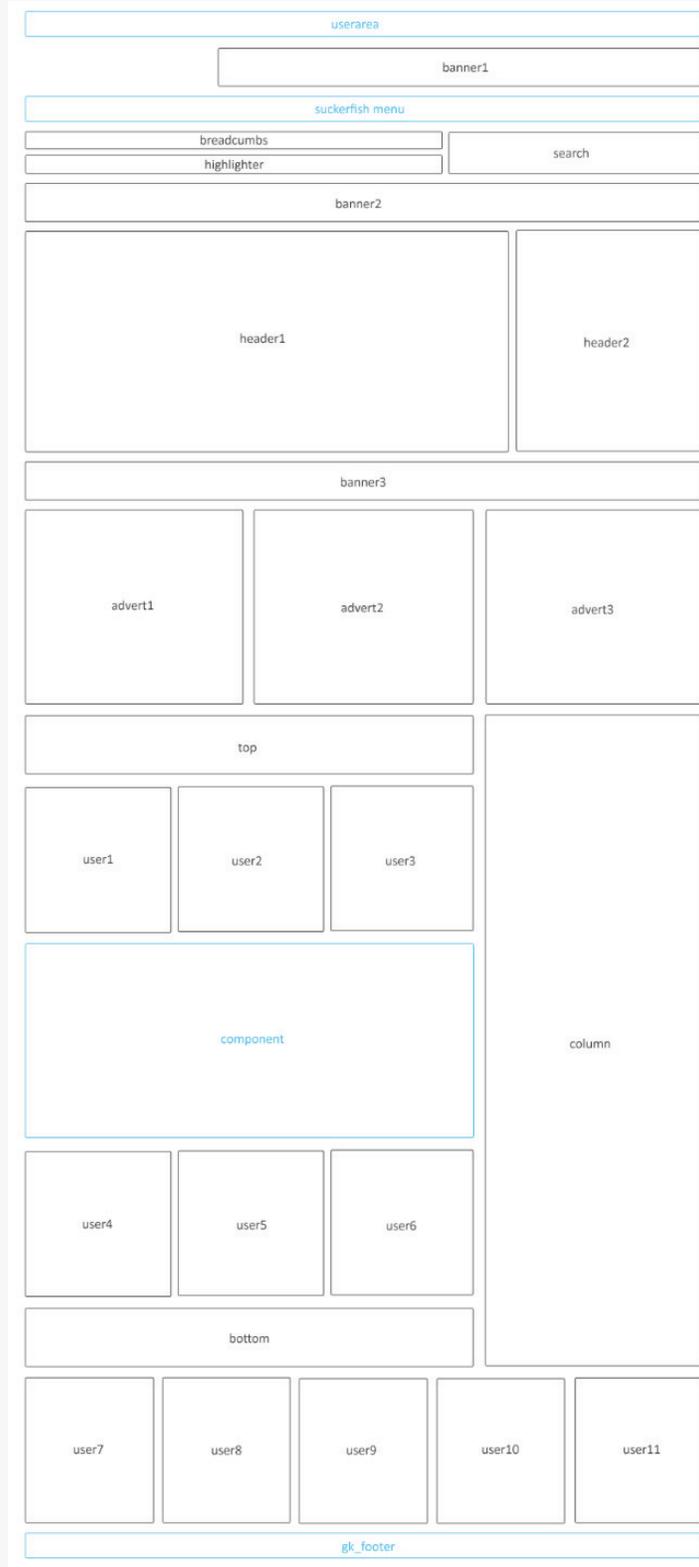

Use animation height in menu.

Menu opacity animation:

Enable/disable the use of opacity animation in menu.

14 Modules Positions

MUCISTUBE template supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right and the 'component' will fill the entire width.

17 Modules Variations

In MUSICTUBE template we provide 2 modules variations with extension style padding, like we will show next.

You can use “`_color`” prefix for dark module style.

In the up screenshot, besides the “`_color`” prefix, you can add no padding class in module. So, the module prefix in this case is “`_color nopad`”.

If you don't set any prefix, the module will display lite style.

In the up screenshot, it's only added the “`nopad`” prefix, but if you don't set anything, the module will be similar like the example, but with existing padding inside the module.
