Elegant news for the most demanding readers!

The News is another revolutionary Gavick design theme, offering users a contemporary and elegant display of news information from Technology to Business presentation. Customize your News in any way and create a unique position in the marketplace reaching readers from around the world.

The News comes along with the powerfull Gavick PhotoSlide GK2 component, working together with the News Image 1 module and the Tabs Manager component, allowing content display in a striking way. The template also includes the latest version of one most popular module in Joomla Community - News Show GK3 tool which allows users to display their news and articles in most professional way, making use of the huge amount of options presentation that only this module can provide. A must-have for any Joomla Web site.

Also, for showing those media news that are almost like a obligation in any web site in this days, we included the Gavick Embed Media module, always very usefull in any joomla web site.

The visuals on this template will have readers in awe! The News is built on a CSS framework and can be easily customized to fit your site's needs.

New in template - News features added with the November'08 template update.

An overview of key features of this template are as follow:

- Tableless design and 100% css based.
- Build support for the PhotoSlide GK2 component and News Image I module. **New in template**
- Build support for Tabs Manager GK2 component and the Tabs Mod module. **New in template**
- Build support for the News Show GK3 module. **New in template**
- Build support for the Gk Embed Media module. **New in template**
- Compressed engine option for each modules. **New in template**
- 3 layout options: 3 columns (inset+right+mainbody), 2 columns (right or inset+ mainbody), 1 column (mainbody).
- All 20 modules are fully collapsible and extra modules set for Tabs Mod use.
- 5 module variations built in.
- Top hidden Login Form panel. **New in template**
- Impressive built-in content style.
- Last Gavick Suckerfish menu version, with 2 built-in options - Suckerfish menu and Mootools. **New in template**

- Lightweight, modern and very fast-loading design
- Joomla 1.5 Native
- W3C XHTML 1.0 Transitional. W3C CSS Valid
- Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome

The News - Overview files

Welcome to our “The News” Template Instructions Manual!

Since all tools used on this template have their own HelpFile, this Manual will give you the major orientation guideness to make your normal installation. For further and details informations about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

The first step to do is download all the files available on our exclusive MemberShip section and also some files that are available on our free section tools. Before we start the template installation, let´s see a brief overview of the files available inside The News package release.

! Sugestion!!!

We strongly recommend some regular visits to our update.gavick.com website, because it may be available some updates of the template and tools used on this project. Also, we invite you to visit our oficial blog on - blog.gavick.com - where we, from time to time, give some usefull information and tips on how to customize or change some features of our templates and tools.

So, here's a brief overview of the files available inside the “The News” Template pack release.

You downloaded the following two compressed files:

gk_thenews_J!15.tgz

This is the template file installation.

gk_thenews_rest_files.zip

! **Important!** You must unpack the this file before doing anything - gk_thenews_J!15_rest_files.zip.

After unpack the file, you will find the following content files and folder:

Components ”folder”

This contains instructions on how to download ours free component - the PhotoSlide GK2 and TabsManager GK2. You must download this components from our free download section

Modules "folder"

GK_Embed_Media_1.O.zip - Module for media player display.

_quickstart!!! "folder"

This is the most easy way installation process! Includes all files needed to set exactly as we show in the demo "The News" template, like suggested previously.

Source "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design.

_doc!!! "folder"

HelpFiles for "The News" template, PhotoSlide GK2 and Tab Manager GK2 components. Also the Helpfile for the News Show GK3 module.

! Important Notice !!!

Again, please take note that the PhotoSlide GK2, TabsManager GK2 and News Show GK3 tools are not inside the "The News" package - on gk_thenews_J!15_rest_files folder. You need to download from our free tools section.

The News - QuickStart installation

We strongly recommend the use of this installation option, because it's the easiest way to install our template and to take advanced immediatly to all components, plugins and modules configurations. It will set your joomla website exactly as we show The News Template in our demo.gavick.com page.

In did, this the most easy way installation process! Why? Because it's like a normal Joomla!1.5 installation. It includes all files needed, the Joomla 1.5.7 stable version, The News II template, the PhotoSlide GK2 and Tabs Manager GK2 components, plugins, extensions, modules and sql demo dump file. All files prepared and ready to a normal joomla installation.

Again, we invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respetive tools. So, keep in touch on update.gavick.com.

Sugestion!!!

Make use of this option and learn the environment of The News template, by making some tests locally, using a local server like (i.e. WampServer) or other available for free in the internet. This way, you be able to install, run and test easily all the potencial of this template.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

Installation Steps for the QuickStart!!! version:

Step 1) Unpack the compressed file QUICKSTART_JAN2008.zip inside of the _quickstart!!! folder and upload the content to your clean joomla website directory folder installation. The files inside are similar to a normal Joomla!1.5 package.

Step 2) Create a new sql Database, using your cpanel on your Web Site.

Step 3) Make a normal Joomla J!1.5 installation using the upload files. **Notice!!!** You will see that it's no necessary at this time to set your Username and Password, because they are already set.

Step 4) After ending the installation, enter in the Administrator using Username "**admin**" and password "**demo**" (*Naturally, you can change this values after!!!*).

If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and others changes.

The News - Quick Guide Manual Installation

For those who need to install the template manually and do not need further information, we present the following short cut step list for The News II installation.

Step 1 - Install the `gk_thenews_J!15.zip` file, using the Joomla Installer.

Step 2 - Go to the Templates Manager and set the “The News” template to your default theme.

Step 3 - Using the Joomla Installer, install the PhotoSlide Gk2 (`com_gk2_photoslide.zip`) and Tabs Manager GK2 (`com_gk2_tabs_manager.zip`) components.

Step 4 - Go to the PhotoSlide GK2 administration (do not use the joomla installer!!!), select “plugins” menu and install the News Image 1 Plugin (`plg_gk_news_image_1.zip`) and the News Show GK3 plugin (`plg_news_show_gk3.zip`). Don’t forget to enable this plugin!!!

Step 5 (Optional) - Go to the PhotoSlide GK2 administration, select “Extensions” menu and install the Rainbow Extension tool (`ext_rainbow.zip`). Don’t forget to enable this extension, if you want to use it.

Step 6 - Go the Joomla Installer! and install the News Image 1 module (`mod_gk_news_image_1.zip`). You now can start working by creating your slide groups on the PhotoSlide GK2 administration.

Step 7 - Go to the TabsManager GK2 Component administration, select “plugins” menu option and install Tab Mods GK2 Plugin (`plg_tab_mods_gk2.zip`) file. Don’t forget to enable this plugin!!!

Step 8 - Next, go to the Joomla Installer! and install the Tab Mods GK2 Module (`mod_tabmods_gk2.zip`). You now can return to the Tab Manager GK2 component administration and start working on your tabs groups.

Step 9 - Using the Joomla Installer, install the Gavick News Show GK3 Module (`mod_news_show_gk3.zip`)

Step 10 - Still with Joomla installer, install the Gk Embed Media Module (`GK_Embed_Media_1.0.zip`)

Step 11 - With all previous 10 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

[View The News in live demo](#)

After the template is successful installed, you must set it as your default template. To do that, navigate to [Extensions](#) > [Template Manager](#) and set the "The News" Template as default Joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

PhotoSlide GK2

Installation and Configuration

Please, read the respective HelpFile included on the package or available for free download on tool.gavick.com.

Tabs Manager GK2

Installation and Configuration

Please, read the respective HelpFile included on the package or available for free download on tool.gavick.com.

News Show GK3

Installation and Configuration

Please, read the respective HelpFile included on the package or available for free download on tool.gavick.com.

GK Embed Media 1.0 Installation and Configuration

Module Installation

Using the Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the module file inside the Modules folder (*GK_Embed_Media_1.0.zip*) and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

Module Configuration

After successful module installation, from the Menu go to Extensions > Modules Manage and enter in panel configuration. Start by the Basic Module [Parameters](#) by configuring the following fields:

Parameters

Module Class Suffix:

Provides the possibility of set a css class that allow's individual module style.

Module unique ID:

Set here the unique ID of module. You can use more than one module on your Joomla! 1.5.3 website. For each one, this ID must be different.

Media URL:

Here you must place the URL of the flash movie if Media Source Provider is available on the Drop Down Media Source Menu. (YouTube Example direct link: http://www.youtube.com/watch?v=VIDEO_ID). This URL will be automatically changed to http://www.youtube.com/v/VIDEO_ID for the engine module script.)

! Important ! In Revver and Viddler Media Players, instead of URL as file ID, you must set as ID only the identification of the file. Example for a Viddler Media File URL: [viddler id=VIDEO_ID&w=437&h=288] the ID must only be the VIDEO_ID value and NOT THE LINK.

For all available Media Source Players, the process is the same by setting the direct URL from the video flash.

Player width:

The width of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player width.

Player height:

The height of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player height.

Media Source:

List of Media Source available.

! Important !

If your Media Source Player is not available on this menu, you must choose "Other (...)" option and next on the Advanced parameters, you must set the embed code, as we are going to show you in the following explanation.

Most important with this option, is that you need to add the `wmode="transparent"` parameters on the media code script.

By selecting one available Media Player on the Module Parameters, you may change it's configuration on each Player.

Naturally, if you pick the YouTube Media Player, the rest of the parameters from others are indifferent.

Each Media Player provide us the possibility to set some different configurations, like size player or the Related Videos Option.

The final field "Advanced configuration of other player" is needed if you choose in Module Parameters a different Media Source Player, different from the available ones. Here you must place the code of the flash media URL

! Important! Please, take note of this important notices:

For Daily motion player options WIDTH and HEIGHT doesn't works - We provide 3 sizes for the player size.

Like we set before, other player option means every player which can be added by embed tag. So if you don't know how the correctly code of the embed file, them we recommend you to drop this option and select a available Media Player.
