- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package".

## Introducing New GK Framework

The World News is second template based on new GK framework. We did listen user voice and even go step further and improved GK Framework to full-fill all your needs and demands for fast but robust framework.

Right now, you may be asking “- GK Framework? What is it ?”

GK Framework is the next stage development of possibilities offered by GavickPro templates. Its basic advantage is the rise of flexibility in relation with the solutions previously used. GK Framework offers huge amount of modules, creating in main configuration three – column arrangement in which, each of column may contain some additional ones.

From the administrative panel level it is possible for the user to specify the whole template and the particular columns width. There is a possibility to specify those columns width which needed and the rest is adjusted automatically. Thanks to the framework template mechanism use, it is allowed to restrict the number of modules displayed without the need of switching them off in Module Manager.

Advanced users in the central file responsible for the framework usage (GKTemplate.php) are able to specify details as follows:

1. Styles used on particular modules positions (xhtml, raw, gkround, etc),
2. Margins, complements and the framing size for each of the main template's blocks,
3. Switching on/off columns' alignment in particular blocks,

Other innovative features:

1. Main body position may be specified and saved in relation with the component content (they may occur interchangeably or together on the positions specified),
2. Possibility of specification the default font size on the site,
3. Possibility of choice of font family used in the template,
4. Message for users of IE6 browser and older versions

## The World News - Overview files

As usual you can download The World News quickstart version for fast installation to enjoy quickly full characteristics of our demo. See respective chapter further ahead.

After having download all of the files from our commercial section, here's an brief content evaluation of the The World News package. Have in consideration that some of the used tools posses their respective support manuals, so we will provide orientation guidance for the respective installation and include also some screenshots about the configurations of all parameters of each module. To get additional informations of our extensions, please read the Support Manual included on the respective package.

[Here's a brief overview of the files available inside the "The World News" template package.](#)

You downloaded the following 3 compressed files:

» **gk\_twn\_J!15.tgz** - This is the template file and for installation, please use Joomla installer.

» **gk\_twn\_rest\_files\_J!15.zip**

After decompression of \_rest\_files.zip you will find following folders:

» **components** "folder"

Contains new com\_gk\_ajax.zip extension and list of common components used on demo server for this template. Components from list can be downloaded for free from Gavick website.

» **modules** "folder"

Here you can find three new modules and information about other used modules and website where you can download them.

» **plugins** "folder"

Contains the GK Typography plugin ([plg.gk\\_typography.zip](#)) for WYSIWYG editor use. For respective installation, please use Joomla Installer and them enable it on plugins manager.

» **source** "folder"

For further customization of template source files may be handy. All files are saved as layered Photoshop PSD files.

» **gk\_twn\_quickstart\_J!15.zip** - This is complete Joomla package including The World News template, components, modules, plugins and content similar to Gavick The World News demo. Installation procedure is same like original Joomla installation, after finishing use admin/demo login information.

## Other files necessary and not available on package

As previously explained, to complete the necessary files for this project, you need to download our free extensions from our site. Get more informations on <http://tools.gavick.com> or download them on <http://www.gavick.com/downloads-area>

Here are the gavickpro extensions used on demo template:

### » **Tabs Manager GK3 component** (IMPORTANT! Unpack the tabsmanager\_3\_pack.zip file.)

**GK Tabs Manager GK3 component** (*com\_gk3\_tabs\_manager.zip*)

This is the Tabs Manager GK3 component and it's located inside of the component folder.

(For installation, please use the Joomla Installer).

**GK Tab module** (*mod\_gk\_tab.zip*)

This is the module is used for frontend content display, exclusive for Tabs manager GK3 version.

(For installation, please use the Joomla Installer).

### » **Photoslide GK3 component** (IMPORTANT! Unpack the com\_photoslide\_gk3\_J15!.zip file.)

**Photoslide GK3 component** (*com\_gk3\_photoslide.zip*)

This is the Photoslide GK3 component and it's located inside of the component folder.

(For installation, please use the Joomla Installer).

**GK Image Show module** (*mod\_gk\_image\_show.zip*)

Photoslide module for presenting latest articles and/or images.

(For installation, please use the Joomla Installer).

This is the module for news and articles display

(For installation, please use the Joomla Installer).

» **GK Ajax component** (IMPORTANT! This component is only available as part of TWN template)

Without unpacking, simply install **GK Ajax component** (*com\_gk\_ajax.zip*) using Joomla installer. No setting of this component after installation is required. This component only works as technical background for GK News and GK Headlines modules.

» **GK Categories module** (IMPORTANT! This component is only available as part of TWN template)

Without unpacking install **GK Categories module** (*mod\_gk\_categories.zip*) using Joomla installer.

**GK Categories module** can show list of all categories inside your Joomla installation maximizing user time spend on your news website.

» **GK Headlines module** (IMPORTANT! This component is only available as part of TWN template)

Without unpacking install **GK Headlines module** (*mod\_gk\_headlines.zip*) using Joomla installer.

**GK Headlines module** is similar to GK Highlight but instead rotating latest news it shows defined number of latest news from defined section/category with use of eye candy features. Thanks to GK AJAX component assistance, there is a possibility to load asynchronously another or positions from database, just after loading the site. This module is a perfect solution for Information Exchange where organizing the space on the site is essential.

» **GK News module** (IMPORTANT! This component is only available as part of TWN template)

Without unpacking install **GK News module** (*mod\_gk\_news.zip*) using Joomla installer.

**GK News module** is advanced solution for presenting articles. For functioning of this module is required GK AJAX component.

» **JComments component and module**

IMPORTANT! This extension has to be downloaded from <http://www.joomlatune.com/jcomments-downloads.html>

» **SmartResizer plugin**

IMPORTANT! This extension has to be downloaded from <http://www.lot-studio.ru/remository?func=startdo wn&id=36>.

» **News Show Pro GK1 module** (IMPORTANT! Unpack the news\_show\_pro\_gk1\_pack.zip file.)

Inside you will find the following files:

GK News Show Pro GK1 module (*mod\_news\_pro\_gk1.zip*)

This is the module for news and articles display

(For installation, please use the Joomla Installer).

» **News Highlighter GK1 module** (IMPORTANT! Unpack the mod\_gk\_news\_highlighter\_J15!.zip file.)

GK News Highlighter module (*mod\_gk\_news\_highlighter.zip*)

This is module for advertising special news in sophisticated and professional style.

(For installation, please use the Joomla Installer).

» **News Show Pro GK1 module** (IMPORTANT! Unpack the news\_show\_pro\_gk1\_pack.zip file.)

Inside you will find the following files:

GK News Show Pro GK1 module (*mod\_news\_pro\_gk1.zip*)

This is the module for news and articles display

(For installation, please use the Joomla Installer).

### Notices!!

Font(s) used on the source files are not provided with the Template package, because they may have copyrights reserved.

The images used on demo might contain other proprietary copyright information that should be considered, so it's strictly prohibited the use, duplication or disclosure of this images.

## The World News Quick Guide Step by Step Installation

For experience users in Joomla!, the following list of tasks should be enough for a proper installation of the template and all extensions. Having as a principle that already have the latest Joomla version installed on your site, follow these basic instructions:

**Step 1)** Install The World News template using the Joomla installer. File: *(gk\_twn\_J!15.tgz)*

**Step 2)** Head to Templates Manager and establish The World News as your default template.

**Step 3)** Again through the Joomla installer, install **Tabs Manager GK3** component. You must first download it from our free download extensions tools. File: *(com\_gk3\_tabs\_manager.zip)*.

**Step 4)** Still from the **Tabs Manager GK3** component package, install the respective module. File: *(mod\_gk\_tab.zip)*.

**Step 5)** Then install the **News Show Pro GK1** module using the Joomla Installer. File: *(mod\_news\_pro\_gk1.zip)*.

**Step 6)** Do not forget to install **Photoslide GK3** component using the Joomla Installer. File: *(com\_gk3\_photoslide.zip)*.

**Step 7)** And still from same package from modules directory install **GK Image Show** module using the Joomla Installer. File: *(mod\_gk\_image\_show.zip)*.

**Step 8)** For fast presenting news you need Ajax. Install **GK AJAX** component using the Joomla Installer. File: *(com\_ajax.zip)*.

**Step 9)** To Advertise to the world your special news, in sophisticated and professional style install **GK News** module using the Joomla Installer. File: *(mod\_gk\_news.zip)*.

**Step 10)** Again with use of Joomla installer install **GK Headlines** module. File: *(mod\_gk\_headlines.zip)*.

**Step 11)** Than install **GK Categories** module with use of Joomla Installer. File: *(mod\_gk\_categories.zip)*.

**Step 12)** Install **GK Weather** module with use of Joomla Installer. File: *(mod\_gk\_weather.zip)*.

**Step 13)** Last Gavick module you need to install to get look similar to Gavick demo site is **GK Stock**. Install module using the Joomla Installer. File: *(mod\_gk\_stock.zip)*.

**Step 14)** To spice up your Joomla content, install **GK Typography plugin** and enable it on Plugins Manager panel. File: *(plg\_gk\_typography.zip)*.

**Step 15)** Install universal thumbnail creator/resizer from Igort called **SmartResizer**. Download and install using Joomla installer *(plg\_smartresizer-content.zip)*.

**Step 16)** From JoomlaTune install **JComments** component *(com\_jcomments\_v2.1.0.0.zip)* using standard Joomla installer.

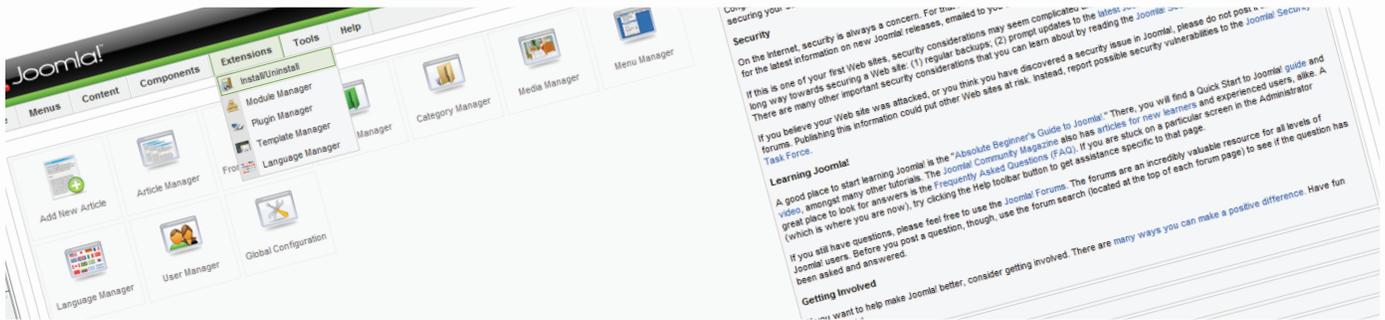

**Step 17)** Again from JoomlaTune install **JComments** Latest module using standard Joomla installer. File: *(mod\_jcomments\_j15\_v2.5.4)*

With all 17 steps completed, your website has all the necessary conditions for The World News template. Further ahead, we provide orientation of the demo modules positions and their respective configurations *(you can find screenshots in following chapter)*.

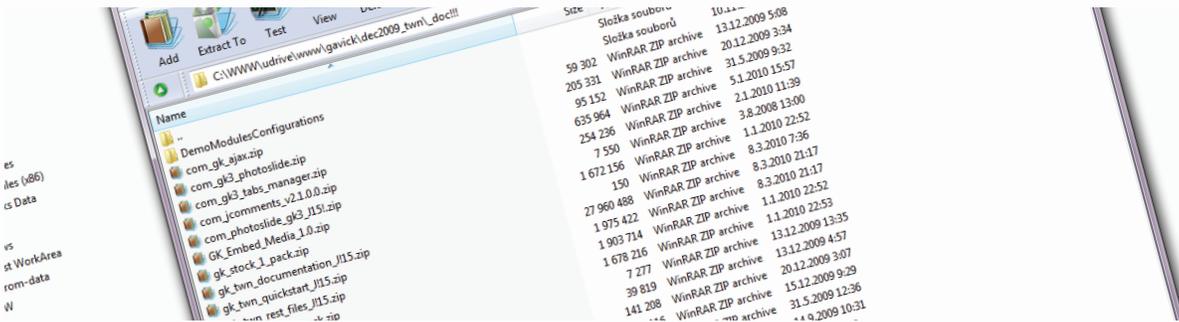

# 4 TWN Template Installation

## The World News template installation

After you have installed the Joomla! 1.5 version, navigate to your Joomla! Administrator and enter inside the administrative panel on your Joomla website. From the top menu, select **“Extensions > Install/Uninstall”**.

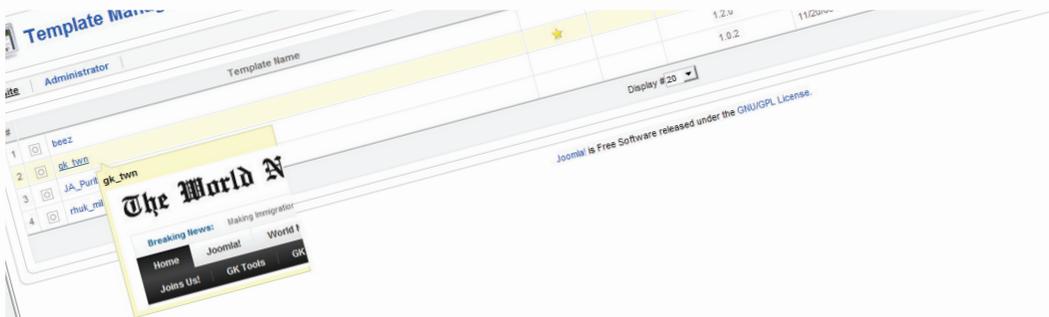

Click the **‘browse’** button, select the template file (*gk\_twn\_J115.tgz*) and press **‘Upload File & Install.’**

Message will be displayed saying **‘Install template Success’**. and showing an overview of the template.

You now have the template installed, but you need to assign it as your default template of your website. To do this, navigate to **“Extensions > Template Manager”** and set it as default template.

With the template installed and assign, let's now see all the parameters available on the template for admin control.

## The World News - Template Parameters

Quay comes with several parameters that you can configure as your needs. To access the template parameters, navigate to “[Extensions > Template Manage](#)” and select `gk_twn` template. Press “[edit](#)” option or just click on template link as you be able to see the following parameters table.

### Presets template parameters:

#### Template color:

Select default template color (Blue/Red).

#### Show mainbody on frontpage:

Show or hide mainbody on frontpage.

#### Mainbody position:

Set mainbody position to the following options:

- . No mainbody
- . Mainbody or component
- . Mainbody before component
- . Mainbody after component

#### Template skeleton:

Set up the structure of the template.

- . Without columns.
- . Left column.
- . Right column.
- . Both columns.
- . Two columns + content.
- . Content + two columns.

### Dimensions:

In this section you can configure width in pixels of all template blocks.

### Fonts:

#### Font families:

Select font families for frontend in template.

#### Font size:

Select font size used in template.

### Features:

#### Login button:

If you want to have login button visible you have to activate this setting. Please mind that you still need to publish login module inside login module position.

#### Register button:

Show or hide register button.

#### Date format:

Use variables according to: <http://php.net/manual/en/function.strftime.php>

So for example you can put there: `%R | %d %B %Y` representing this: 16:44 | 01 January 2010

#### IE6 alert:

Given that this template does not have support for IE6, activating this option, the visitor of your page will automatically see internet information on IE6, advising him to upgrade his browser to IE7 or higher version.

#### Logo as image:

If you want to have normal image instead of link with background - enable this option. **IMPORTANT: when you enable this option, style change won't change your logo till page refresh.**

Also, enable this option if you want to include your logo in print format page.

#### Use compressed template JS and CSS:

Enable this option if you want to use compressed JS and CSS for faster website loading (it effectively reduces JS and CSS file size).

#### Style switcher:

Show or hide style (Red - Blue - Green) style switcher in site footer part.

#### Copyright:

If you need to change frontend copyright's to your own, here you can easily change the footer content.

## Modules used in QuickStart package

The following screenshot contains the resume list of the modules used on the demo template and the respective positions. Template QuickStart package is equipped with several modules positions (as shown on page 13). Exact module type and module names used are shown on page 14.

-  Gavick module used in QuickStart package
-  3<sup>rd</sup> party module used in QuickStart package
-  Default Joomla! module used in QuickStart package

In case you are having problem with configuring modules to match Gavick Demo site, please, continue reading Modules Variations and Module Configuration on next pages.

## Module as Component (on mainbody).

Our templates allows you to display any Module as Component (on component mainbody position). It will display full width or not, depending on the module width configuration. If you have any doubt of this feature, please ask us for support in GavickPro Official Forum.

## Modules Variations

The World News template comes with embed style modules positions and with the following modules suffix.

Please mind different suffix look for different template style!

By default, the right screenshot show the style of the module with the module title enabled.

**Badges:** All styles can be supplemented with badges on the right side module header. Here are the following badges suffix:

[space]\_badge b-new    [space]\_badge b-updated

[space]\_badge b-hot    [space]\_badge b-top

[space]\_badge b-popular

There are ten module class suffixes included in his template.

\_ver1

\_ver2

\_ver2a

\_ver2b

\_ver3

\_ver3a

\_ver3b

\_ver4

\_ver4a

\_ver4b

And do not forget that you can add badge to above mentioned module class suffixes resulting in 60 possible combinations.

## Examples of possible module suffix combination with badges:

<p><b>POPULAR 21</b> <i>NEW</i></p> <ul style="list-style-type: none"> <li>• Fighting back against unemployment</li> <li>• Ali Velshi - Health care reform options</li> <li>• Interior Mountain home inSan Diego</li> <li>• Showtime suggests better times ahead</li> <li>• Your Rights When Buying On Credit</li> </ul>	<p><b>POPULAR 22</b> <i>TOP</i></p> <ul style="list-style-type: none"> <li>• Fighting back against unemployment</li> <li>• Ali Velshi - Health care reform options</li> <li>• Interior Mountain home inSan Diego</li> <li>• Showtime suggests better times ahead</li> <li>• Your Rights When Buying On Credit</li> </ul>	<p><b>POPULAR 23</b> <i>UPDATED</i></p> <ul style="list-style-type: none"> <li>• Fighting back against unemployment</li> <li>• Ali Velshi - Health care reform options</li> <li>• Interior Mountain home inSan Diego</li> <li>• Showtime suggests better times ahead</li> <li>• Your Rights When Buying On Credit</li> </ul>

## Tabs Manager GK3

Tabs Manager GK3 is an amazing tool to display content on tabs, like articles, modules or even custom XHTML content. You need to download this component from our free download section on <http://www.gavick.com/downloads-area.html>.

Please, before installation unpack this file first.

### Component Installation

Using the Joomla Installer, get `com_gk3_tabs_manager.zip` file and select “upload and install”. A message will appear saying “Upload Component - Success” and it will show you an overview of the component.

Warning! You cannot link directly the component using joomla menu for frontpage display.

### Component Setting

After installation go to Gavick Tabs Manager GK3.

**Step 1)** Create group (just select name and description)

**Step 2)** Add tabs. Tabs in demo are created using XHTML tab type and video is pasted as embeded code without using WYSIWYG editor!! Please note, that when adding videos you need to use `wmode=transparent`. For more info go to: [http://kb2.adobe.com/cps/142/tn\\_14201.html](http://kb2.adobe.com/cps/142/tn_14201.html)

There is no futher setting necessary within Gavick Tabs Manager GK3. Continue with module installation and module setting.

## GK Tabs GK1 Module Installation

For front end display of the Tabs Manager GK3 groups content, please use the Gavick Tabs GK1 Module.

Using the Joomla Installer, search for the [mod\\_gk\\_tab.zip](#) and select "upload and install". A message will appear saying "Install Module Success". You can now see this module available on "Extensions > Module Manager" list.

## GK Tabs GK1 Module Configuration

If you need to check our module configuration used on the demo template see image on right side.

Most importantly do not forget to specify Tabs group and module height (340px in demo), module width is not necessary.

Demo uses Style CSS - Style 1 and Style type - horizontal

**IMPORTANT!!!** - In case you find problems with module style (i.e. - strange border around module), you can disable module CSS in advanced parameters. By doing this, it should solve your problem.

For further detail information, please read the Tabs Manager GK3 HelpFile provided in the \_doc! folder package.

# PhotoSlide GK3

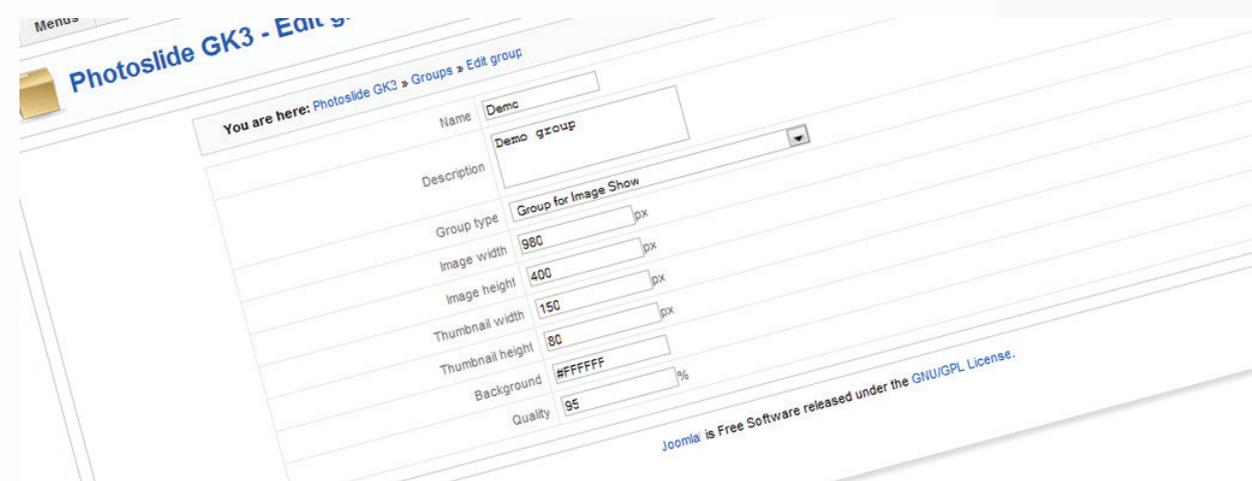

PhotoSlide GK3 is the most advanced and free component for Image Slide available for Joomla!1.5. You need to download this package from our free tools download section on <http://www.gavick.com/downloads-area.html> and then unpack this file. Using the Joomla Installer, search for the `com_gk3_photoslide.zip` and select "upload and install". A message will appear saying "Upload Component - Success" and it will show you an overview of the component.

For further detail information, please read the PhotoSlide GK3 HelpFile provided in the `_doc!` folder package.

## PhotoSlide GK3 Group Setting

Following also the instructions available on the PhotoSlide GK3 Helpfile, here's a screenshot from the group configuration used on the demo for the `Header1` module on `mainbody` position. Set the following parameters group fields.

**Name:**

Set name ID for the group.

**Description:**

Give some description of your group.

**Group type:**

Set your group type between Image Group and News Show Pro GK1 group. In this case, you need to select Image Show Group type.

**Thumbnail height:**

Set height for thumbnails in pixels.

**Image width:**

Set main image width in pixels.

**Image height:**

Set main image height in pixels.

**Thumbnail width:**

Set width for thumbnails in pixels.

**Quality:**

Set images quality in percentagem (recommended values between 75 and 95%).

# News Show Pro GK1

News Show Pro GK1 extension is one of the most popular extension on Joomla Community. For many users, perhaps the best ever made. We like to think that the best is yet to come.

With its powerful capabilities and presentation of articles and news content, News Show Pro GK1 offers you an amazing ways to display your website content in the most stylish and highest level of professional presentation.

Once again, you need to download this free module from our tools download section on <http://www.gavick.com/downloads-area.html> and them unpack the file.

## Module Installation

To install, use the Joomla Installer, search for the `mod_news_pro_gk1.zip` and select “upload and install”.

A message will appear saying “Upload module - Success” and it will show you an overview of the module.

## Module Configuration

To avoid repetition of the instructions included in the Support Manual of this tool, please see the respective files available on the extension package. There you will get orientation the administrate the different parameters available on News Show Pro GK1.

**IMPORTANT!!!** - In case you find problems with module style (i.e. - strange border around module), you can disable module CSS in advanced parameters. By doing this, it should solve your problem.

For further detail information, please read the News Show Pro GK1 HelpFile provided in the `_doc!` folder package.

# GK News module

GK News module is an advanced solution for those who want to present their articles organized in sections and categories. Dropped down blocks with sections guarantee optimal space use on the site. Thanks to support for GK AJAX component and settings panel application for each section, storefront user has the possibility to adjust the content to his/her needs by choosing category, section order specification in component and the number of articles presented. The use of data stored in cookies files allows the Internet user to save configuration created in his/her computer. By template system, it is possible to set appearance of individual module parts with the data downloaded from database. Thanks to this, possibilities of module appearance change are nearly unrestricted. Undoubtedly, by its possibilities, this module suits perfectly as the main element of Information Exchange.;

Please, do not forget to use unique module ID. This is necessary if you want to have more than one module instance.

## Intro news template setting

# Gavick Image Show Module

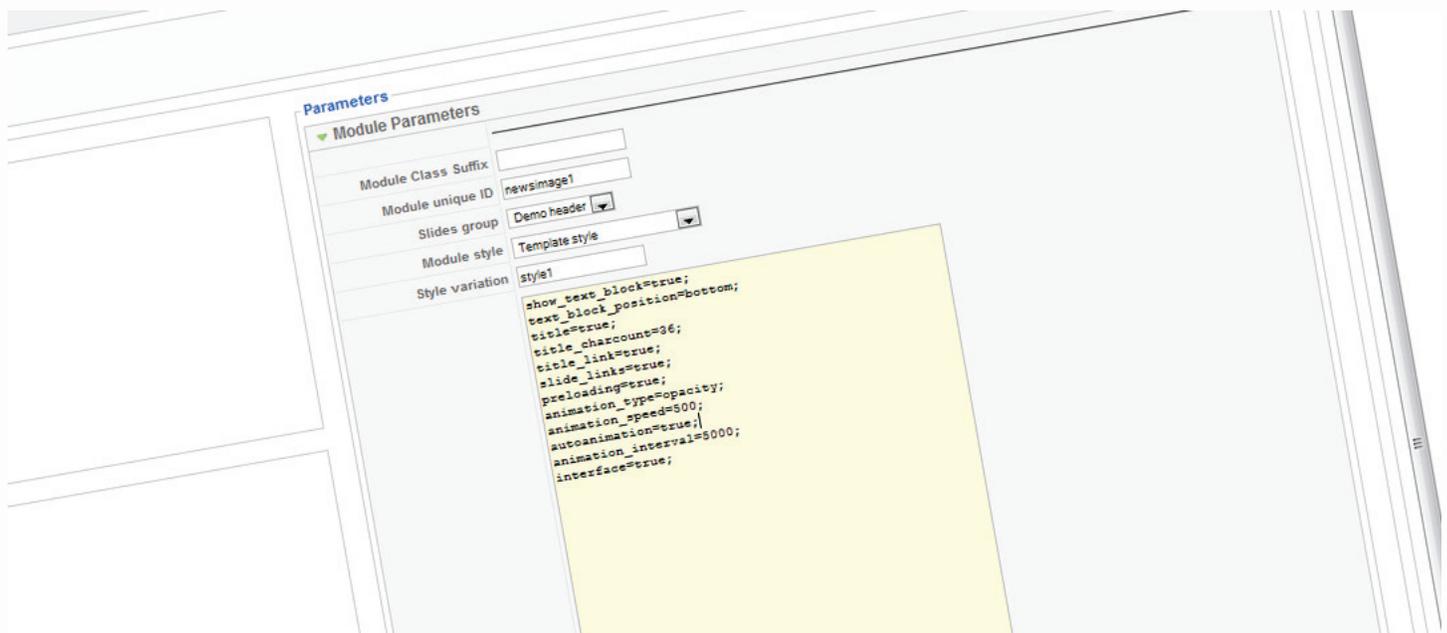

For frontend display of the PhotoSlide GK3 groups, you need to use the GK Image Show module. In this template, we create an exclusive module style and engine for Image Show module with his our parameters. So, using the Joomla Installer, search for the mod\_gk\_image\_show.zip and select "upload and install" A message will appear saying "Install Module Success". If all goes well, you should see the Gavick Image Show module available on "Extensions > Module Manager" list. Find the module and get inside for configurate.

## Module Configuration

To avoid repetition of the instructions included in the Support Manual of this tool, please see the respective files available on the extension package. There you will get orientation the administrate the different parameters available on News Show Pro GK1.

**IMPORTANT!!!** - In case you find problems with module style (i.e. - strange border around module), you can disable module CSS in advanced parameters. By doing this, it should solve your problem.

## Module parameters:

### Module Class Suffix:

A suffix can be applied from the css class of the module (table, moduletable) an this will allow individual module CSS style.

### Module unique ID:

Each module must have unique ID, if you have two or more modules working (i.e. newsimage1 or newsimage2)

### Slides Group:

Select your group from the component to be displayed in this module.

### Module Style:

Select style for your module. In this case, since Hit Music template has built-in style for this module then please select 'template style'

### Style Variation:

Select style variation for module - it is a CSS filename without extension.

## Settings:

### thumbs:

Enable thumbs option display [true or false].

### thumbs\_top:

Set thumbs position from the top (i.e. 80).

### thumbs\_left:

Set thumbs positions from left (i.e. 60).

### pagination\_left:

Set pagination position from left (i.e. 50).

### pagination\_top:

Set pagination position from top (i.e. 350).

### slide\_links:

Enable image slide as links [true or false].

### preloading:

Enable preloading option of slides [true or false].

### animation\_speed:

Set speed for animation effect of the slides [i.e. 1000] = 1 second.

### animation\_interval:

Sets the interval between animations in ms [i.e. 5000] = 5 second.

### autoanimation:

Enable auto animation on slides [true or false].

### animation\_type:

Slide animation type [opacity, top, left, right or bottom].

### text\_block:

Enable text block on slide [true or false].

### text\_width:

Set text block width in pixels [i.e. 500].

### text\_height:

Set text block height in pixels [i.e. 90].

### text\_left:

Set text block position from left on slide [i.e. 30].

### text\_top:

Set text block position from top on slide [i.e. 300].

### show\_title:

Enable title on slide? [true or false]

### title\_link:

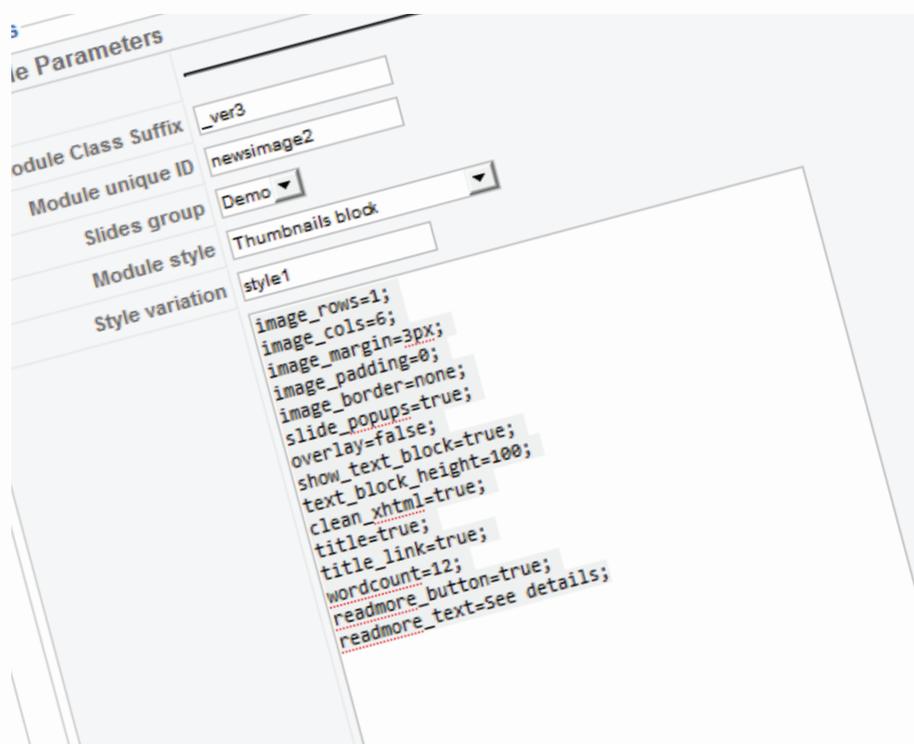

Enable title as links [true or false].

Enable slides preloading option [true or false].

### wordcount:

Set amount of words on text block [i.e. 30].

```

image_rows=1;
image_cols=6;
image_margin=3px;
image_padding=0;
image_border=none;
slide_popups=true;
overlay=false;
show_text_block=true;
text_block_height=100;
clean_xhtml=true;
title=true;
title_link=true;
wordcount=12;
readmore_button=true;
readmore_text=See details;
    
```

# GK Headlines Module

GK **Headline** module is an easy in support module used to present the latest articles from categories chosen. Thanks to template system for displaying elements and information downloaded from database, user is able to change module appearance easily by customizing it to his/her needs. Thanks to **GK AJAX** component assistance, there is a possibility to load asynchronously another or positions from database, just after loading the site. This module is a perfect solution for Information Exchange where organizing the space on the site is essential.

## Module Configuration

Setting is relative simple. Fill in unique module ID as first step. Next select from which categories you want to get headlines.

Design settings - you can choose between layout1-layout3.php

See images on left side, top image use layout1.php setting.

Middle image use layout2.php setting.

Bottom image use layout3.php headline item template setting.

## GK typography plugin overview

We implemented this new feature extremely useful for the use of typography, specially created for the template. Like in all Joomla templates, characterization of the text style is added to enrich even more the respective content. However, we may say that some Users have not been motivated to use this potential, perhaps because this information was not easily available.

So, in order to promote and facilitate the use of the typography, we added a special plugin that will allow Users to set easily any typography style in text.

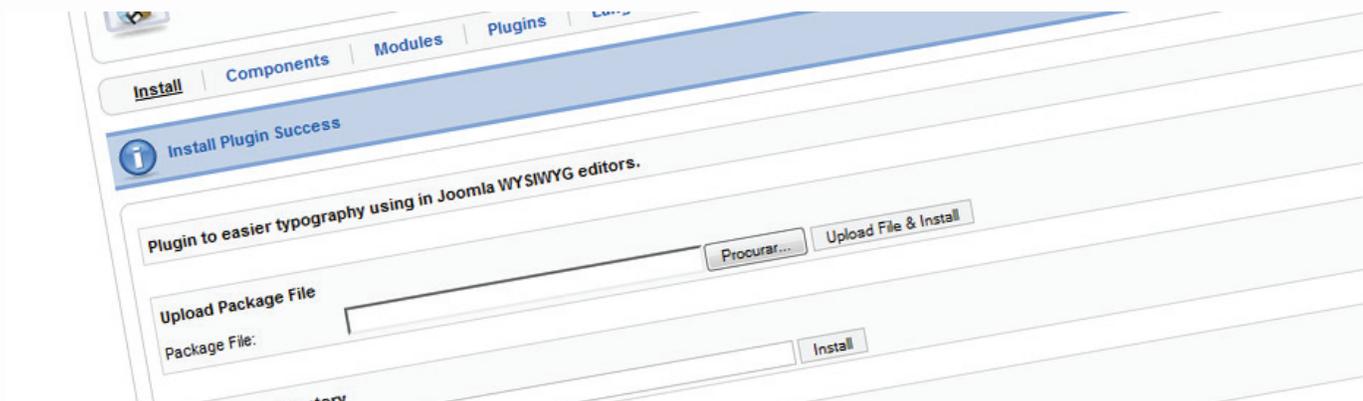

This new feature will be implemented in all our future templates and also on our old templates from 2008 to 2009.

## GK typography plugin installation

Go to “[Extensions > Install/Uninstall](#)” and select the [plg.gk\\_typography.zip](#) file, available inside the plugins folder on the [gk\\_elvesocial\\_J!15\\_rest\\_files](#) package. Upload file and install.

A message will appear saying “[Install Plugin Success](#)” and it will show you an small description of the plugin.

Next, you will need to enable it on the Plugin Manager of your Joomla.

So, navigate “[Extensions > Plugin Manager](#)” and find the [Button - GK Typography](#) Plugin and enable it.

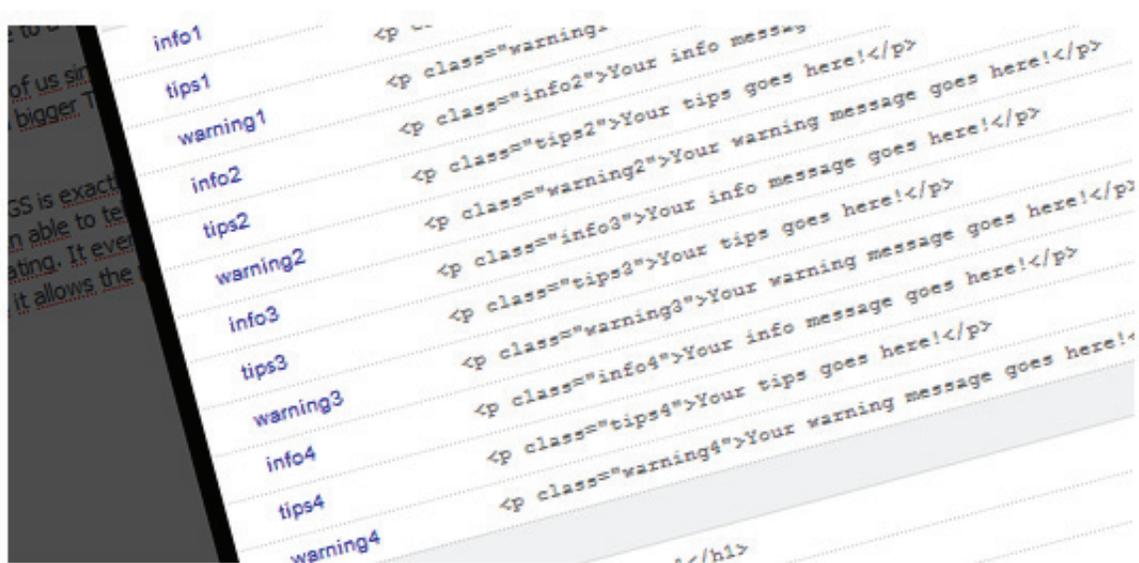

## GK typography plugin How to Use

It's very easy to work with, as you be able to see.

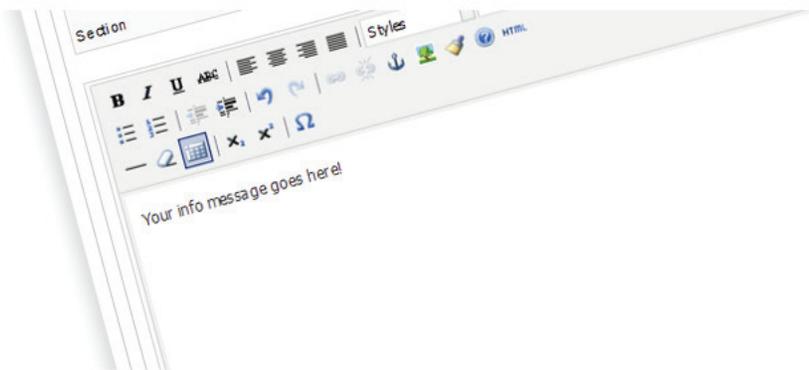

So, let's start by creating a new article. Go to "[Content > Articles Manager](#)" and press new button. Now you will see the normal WYSIWYG joomla editor and on the bar above you will find the [GK Typography button](#).

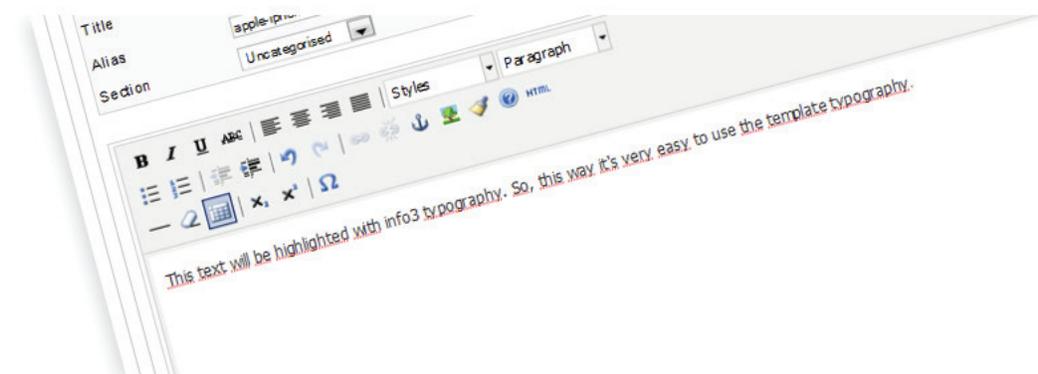

Click on it and a modalbox will popup with all the Typography added to this template. Scroll down top select the desired one, and press the respective text style on the left column.

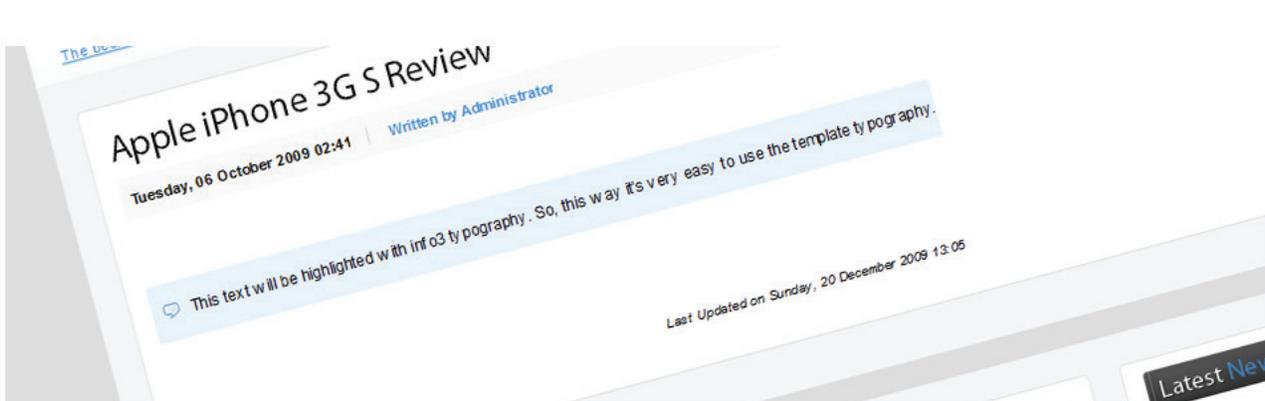

For example, i will select the “info3” typography style. So, i just press on it and immediately text will be added on the text area.

Now, i just need to replace the existing text with my own and save.

So, let's see the result on frontpage.

Nice, right?

Easy and friendly interface, this will be very important to help you to create stunning articles styles.

Here are some recommendations that might help you.

## Are you new in Joomla?

If you are new in Joomla, we strongly recommend that you perform some tests and experiences to fit into this excellent CMS (Content Management System), and visit the official support forum of [www.joomla.org](http://www.joomla.org) for any problem direct relationship. GavickPro Studio is not responsible for Joomla, neither gives respective support. Nevertheless, if possible, we will be happy to help you in our support forum.

## Building a new Website ?

If you are building a new website and if you like our demo, we strongly recommend the use of QuickStart version, and from this start change it with your own content and easily make any necessary configuration adjustments.

## Get quick acquaint with The World News template

In all cases, if you are a new or already experience user, we always recommend experimental version, using free popular local server like XAMPP or WAMP (*you can find easily information on internet about this excellent tools for website development*) or if you prefer, an online test installation. This way, you be able to fit more fast and easily in some tools configurations, modules positions and other particular details that you need to know.

## You already have a website and want to use this template ?

If you choose to install this template in an already existing website, make sure that you have the latest version of Joomla (*present version - J!1.5.15*). If not, please upgrade to insure compatibility with our template and extensions. Naturally, if this is your case, you must install all files individual, from template to components, modules and plugins. Nevertheless, please remember that the QuickStart version is still important ally for orientation. Just remember the previous recommendations.

## Do you have some problems with our extension?

Some usual problems reported on our support forum are script conflict from 3<sup>rd</sup> party extensions. If you know Joomla enough, you know there's an huge amount of solutions and extensions available for free or commercial from other teams or developers. Naturally, you will search others extensions to complete some particular functionality to fulfill your website needs. But understand that we are responsible only for our template and extensions, and we cannot guarantee that all 3<sup>rd</sup> party tools will work perfectly with our project. So, it's in your hands to choose those extensions on Joomla Community. Nevertheless, ask for support in our forum, and if possible we will try to provide your solution.

Another usual problem identified in our forum is related with permissions on files and directory. Some tools need specific files to have rewrite or read permissions, so you might find some problems if you don't have this permissions set. Notice that we cannot control your server security configurations, but we can provide directions were you must change this permissions. If you are unable to change it, we advice you to contact your host provider.

## Keep always updated!

We strongly recommend regular visits to [update.gavick.com](http://update.gavick.com), were you can find the latest updates of our templates, components, plugins or modules. If you have any problem, please be sure if the solution is not already available. This way will avoid waste time, searching or asking for solutions in our forum support.

## Keep always updated!

We strongly recommend regular visits to <http://www.gavick.com/updates.html> where you can find the latest updates of our templates, components, plugins or modules. If you have any problem, please be sure if the solution is not already available. This way will avoid waste time, searching or asking for solutions in our forum support.

## Need some small Style customization adjustment?

You can always request support to our Moderators or Developers, but you need to take in mind that this is customizing and not regular support service. In future, GavickPro might provide personal customizing services and installation support, but it's not yet available as standard service. The Developer MemberShip is excluded, since this subscription already have this type of support, if needed. Nevertheless, we will always try to help you.

If you have some experience in CSS styling, we strongly recommend the use one of the most powerful tool for WebDesigners, available for free in [FireFox addons](#) - The [FireBug](#) - without any doubt, you can't find most powerful ally if you are building a website.

## What is the better way for me to report my problem in the support forum?

If you need help on some issue, please report on our forum in the most objective way, be polite and preference in english language.

Always identify your URL for faster support, because in most cases our support team needs to see the problem.

## Need to contact Us?

Besides our official forum support, you can also contact us by Skype. Please check our contact page and we will reply as soon as possible.

We are a professional Joomla! Development Studio offering **innovative** products and services of **best quality** design.
