Some have said in life, you have to be smooth or aggressive, comprehensive or demanding, careful or daring.

No matter mistakes are made, we learn and choose our path!

During our early life, we develop our original attitude which will intensely follow us along with our relations with others. VIYO reflects in web your attitude in life, should it be softer or charismatic, it will be your perfect partner to express your emotions thought out all wide worlds.

With the most stylishness touch and inspiration from our designers, please welcome VIYO, our newest top creative Joomla template that you will love... it already loves you!

An overview of key features of this template is as follow:

- » Table less design and 100% css based.
- » 2 color variations theme style (blue – brown)
- » 6 background variations for each themes.
- » Build support for PhotoSlide GK2 component and the Gk News Image III module (specific design for this template).
- » Build support for the new version of the News Show GK3 module – v3.2.0 (Now, with new features added and more style control)
- » Build support for the Gk Embed Media module.
- » Disable option for main body appearance on front page.
- » Slide Login Form module.
- » Scalable font size control.
- » Compressed engine option for each modules.
- » Support for language translation.
- » 2 layout options: 2 columns (right + component) and 1 column (component).
- » All 26 modules are fully collapsible
- » 3 Modules variations layout built in.
- » Impressive built-in content style.
- » Last Gavick Suckerfish menu version\, with 2 built-in options - Suckerfish menu and Mootools. Now with bottom slider sniper effect.
- » 34 different styles moomenu animation effects.
- » Speed menu animation option
- » Optional IE6 Warning / Upgrade Notification
- » Lightweight, modern and very fast-loading design
- » Joomla 1.5 Native
- » W3C XHTML 1.0 Transitional. W3C CSS Valid
- » Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- » Delivered with source Adobe .PSD files.
- » Delivered with “QuickStart Package”

VIYO - Overview files

The first step to do is download all the files available on our exclusive MemberShip commercial section and also some files that are available on our free tools section. Before we start the template installation, let´s see a brief overview of the files available inside the VIYO package release.

Since some tools used on this template have their own HelpFile, this Manual will give you the major orientation guide to make your installation. For further and details informations about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

Sugestion!!!

We strongly recommend some regular visits to our update.gavick.com website, because there may be available some updates of the template and tools used on this project. Also, we invite you to visit our oficial blog on - blog.gavick.com - where we, from time to time, give some usefull information and tips on how to customize or change some features of our templates and tools.

[So, here's a brief overview of the files available inside the "VIYO" Template pack release.](#)

You downloaded the following two compressed files:

» [gk_viyo_blue_J!15.tgz](#)

This is the template file installation with the blue theme style.

» [gk_viyo_brown_J!15.tgz](#)

This is the template file installation with the brown theme style.

» [gk_viyo_J!15_rest_files.zip](#) "Unpack this file first!!!"

After unpack you will find the following "gk_viyo_J!15_rest_files" folder witch contains the following files:

» [_doc!!!](#) "folder"

Here's the present Instructions Manual, the PhotoSlide GK2 Component and also the News Show GK3 HelpFiles.

» [_quickstart!!!](#) "folder"

The VIYO package comes with a QuickStart package version installation. If you are making a new Joomla installation, we strongly recommend this option, because this is the most easy way installation process! Includes all files needed to set exactly as we show in the "VIYO" demo.

» **QUICKSTART_JAN2009_BLUE.zip** "Unpack this file first!!!"

This is the Blue Theme version.

» **QUICKSTART_JAN2009_BROWN.zip** "Unpack this file first!!!"

This is the Brown Theme version.

» **Modules** "folder"

Gavick Embed Media module (*GK_Embed_Media_1.0.zip*) - This module displays external media players like for example Youtube, Vimeo and all others that provide public their embed source code.

» **Source** "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design. **Notice!!** The font type used on the source files are not provided with the Template package, because they may have copyrights reserved.

IMPORTANT!!!

To complete the necessary files, you must download our [PhotoSlide GK2](#) Component and [News Show GK3](#) module packages, available for free on donwload section. Them unpack those files and use them when neede, as we explain in next chapter.

Recommendation !!!

We strongly recommend the QuickStart installation, but if you need to install the VIYO template on a existing website, doing step by step installation, first you must check if you have the lastest Joomla!1.5 version and if not, please upgrade before any installation.

VIYO QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediately of all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files needed. It will set your Joomla website exactly as we show the VIYO Template in our [demo.gavick.com](#).

Again, we invite you to visit us regularly, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respective tools. So, keep in touch on [update.gavick.com](#).

Sugestion!!!

You can easily get acquainted of the VIYO template environment, by making some local tests, using a local server like (i.e. XAMPP or WAMP Servers) or others available for free in the internet. By installing this local servers, you be able to install, run and test easily all the potencial of this template without any problems. This make all the difference and we guarantee you that will avoid wasting time by searching our support forum, when the answer is already available on the QuickStart version.

Notice that in VIYO QuickStart package, we provide two versions of quickstart's - one for each theme. So, if you want to use only one, select the respective QuickStart Theme version. Even so, after you install (for example) the Blue Theme QuickStart version, you can also install the brown theme (gk_viyo_brown_J!15.tgz) template and change it in the Joomla Template Manager.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

Installation Steps for the QuickStart!!! version :

We will use for demonstration the Blue Theme!

Step 1) Unpack the compressed file QUICKSTART_JAN2009_BLUE.zip inside of the _quickstart!!! folder and upload all the content inside of the QUICKSTART_JAN2009_BLUE folder to your clean website directory. You will notice that this files are similar to a normal Joomla!1.5 package. That's because it's like a normal Joomla installation.

Step 2) Create a new Database in your Website.

Step 3) Make a normal Joomla J!1.5 installation steps using the upload files. **Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.**

Step 4) After ending the installation, enter in the Administrator using Username "admin" and password "demo" *(Naturally, you can change this values after!!!).*

That's it! Easy, was not?

Of course it was. If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and others changes.

VIYO Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further details information, we prepare the following short cut, step by step task list for the VIYO installation.

Important recommendation!!!

Before starting the installation, please be sure to check if you have the latest Joomla!1.5 version and if not, we strongly recommend that you upgrade your Joomla website.

- » **Step 1** - Install the VIYO template ([gk_viy0_blue_J!15.tgz](#) and/or [gk_viy0_brown_J!15](#)) using the Joomla Installer.
- » **Step 2** - Go to the Templates Manager and set the “[gk_viy0_blue](#) or [gk_viy0_brown](#)” template to default.
- » **Step 3** - Using the Joomla Installer, install the [PhotoSlide Gk2](#) ([com_gk2_photoslide.zip](#)) component.
- » **Step 4** - Go to the PhotoSlide GK2 administration ([do not use the Joomla installer!!!](#)), select “plugins” menu and install the [Plugin Gk News Image III](#) ([plg_gk_news_image_3.zip](#)). [Don't forget to enable this plugin!!!](#)
- » **Step 5** (Optional) - Go to the PhotoSlide GK2 administration, select “Extensions” menu and install the [Rainbow Extension tool](#) ([ext_rainbow.zip](#)) and the [EasyLinks Extension](#) ([ext_easylinks.zip](#)). Don't forget to enable this extension, if you want to use it.
- » **Step 6** - Go the Joomla Installer! and install the [Gk News Image III](#) module ([mod_gk_news_image_3.zip](#)). You now can start working by creating your slide groups on the PhotoSlide GK2 administration.
- » **Step 7** - Using the Joomla Installer, install the [News Show GK3](#) module ([mod_news_show_gk3.zip](#)).
- » **Step 8** - Using the Joomla Installer, install the [Gk Embed Media](#) module ([GK_Embed_Media_1.0.zip](#)).
- » **Step 9** - With all previous 9 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

! Notice!!!

Please, take note that if you are installing our template and tools in a “unclean” Joomla website (with some 3th party components, modules or plugins), we cannot guarantee that all will work in perfect conditions. We can only guarantee the proper functioning of our tools or template functionality. If you find any inconsistency with another script, use the forum support and if possible, we will try to find a solution, but without any compromise.

Demo Modules Positions

VIYO template installation

Navigate to your Joomla! Administrator and enter in the administrative panel on your Joomla site.

From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the template file (([gk_viyu_blue_J!15.tgz](#) and/or [gk_viyu_brown_J!15](#)) and press 'Upload File & Install.'

A message will appear saying 'Upload template - Success.'

This page will display an overview of the template, then select 'Continue...'

i Install Template Success

VIYO

Some have said that in life, we have to be smooth or aggressive, comprehensive or demanding, careful or daring. No matter the mistakes are made, we learn... and choose your path!

During our early life, we develop our original attitude which will intensely follow us along with our relations with others. VIYO reflects in web your attitude in life, should it be softer or charismatic, it will be your perfect partner to express your emotions thought out all wide worlds.

With the most stylishness touch and inspiration from our designers, please welcome VIYO, our newest top creative Joomla template that will loves You for a long time!

An overview of key features of this template are as follow:

- Tableless design and 100% css based.
- 2 color variations theme style (light blue – brown)
- 6 background variations for each themes.
- Build support for PhotoSlide GK2 component and the Gk News Image III module (specific design for this template).
- Build support for the new version of the News Show GK3 module – v3.2.0 (Now, with new features added and more style control)
- Build support for the Gk Embed Media module.
- Disable option for main body appearance on front page.
- Slide Login Form module.
- Scalable font size control.
- Compressed engine option for each modules.
- Support for language translation.
- 2 layout options: 2 columns (right + component) and 1 column (component).
- All 26 modules are fully collapsible.
- 3 Modules variations layout built in.
- Impressive built-in content style.
- Last Gavick Suckerfish menu version, with 2 built-in options - Suckerfish menu and Mootools. Now with bottom slider sniper effect.
- 34 different styles moomenu animation effects.
- Speed menu animation option
- Optional IE6 Warning / Upgrade Notification
- Lightweight, modern and very fast-loading design
- Joomla 1.5 Native
- W3C XHTML 1.0 Transitional, W3C CSS Valid
- Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package"

[View VIYO in live demo](#)

After the template is successful installed, you must set it as your default template. To do that, navigate to [Extensions](#) > [Template Manager](#) and set it as your default Joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the _doc! folder package.

You need to download this package from our free tools download section on www.gavick.com and then unpack first this file.

Using the Joomla Installer, search for the `com_gk2_photoslide.zip` and select “upload and install”

A message will appear saying “Upload Component - Success” and it will show you an overview of the template. Then select “Continue”...

Gk News Image III Plugin Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

The process installation of the plugin is exactly the same as stated on the HelpFile.

Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator to install any plugin or extension available.

So, navigate to the PhotoSlide GK2 administration, select “plugins” option and choose “Install Plugin”. Then search the `plg_gk_news_image_3.zip` file locally and click “Save” on right menu.

If all goes well, you should be able to see the plugin successful installed, like the following screenshot indicates.

Groups | **Plugins** | Extensions | Check system | Help | Info | GavickPro News

i Plugin has been installed successfully

#	ID	Status	Name	Description	Type	Version
1	2	<input type="checkbox"/>	GK News Image III	XML file for module Gavick News Image III	module	2.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

The next step is to select the plugin, by enable the check box and on the right menu, click on “Enable Plugin”.

#	ID	Status	Name	Description	Type	Version
1	2	<input checked="" type="checkbox"/>	GK News Image III	XML file for module Gavick News Image III	module	2.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let’s see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk News Image III is no exception to this rule. So, select the “Groups” option and click on “Add Group” option. As we only have one plugin installed, this will be assume by default on the group creating process.

Photoslide GK2 - Add group

You have only one enabled plugin so this plugin was automatically selected for this new group

Group name:

Images quality (0-100): %

Image width: px

Image height: px

Thumbnail width: px

Thumbnail height: px

Background color:

Title color:

Text color:

Link color:

Hover link color:

The following parameters are the ones that you will need to set on the group configuration:

Group name:

For identification of the group, that will be necessary on the module configuration.

Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most possible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

Image width and height:

Set image width and height in pixels.

Thumbnails width and height:

Set thumbnails width and height in pixels.

Background color:

Color value in hex format for background (i.e. #FFFFFF).

Title color:

Color value in hex format for Title (i.e. #FFFFFF).

Text color:

Color value in hex format for text (i.e. #FFFFFF).

Link Color:

Color value in hex format for Link text (i.e. #CCCCCC).

Hover Link color:

Color value in hex format for Hover Link user event effect (i.e. #000000).

Group name:	Header 1
Images quality (0-100):	90 %
Image width:	459 px
Image height:	160 px
Thumbnail width:	140 px
Thumbnail height:	60 px
Background color:	#000000
Title color:	#FFFFFF
Text color:	#AAAAAA
Link color:	#CCCCCC
Hover link color:	#EEEEEE

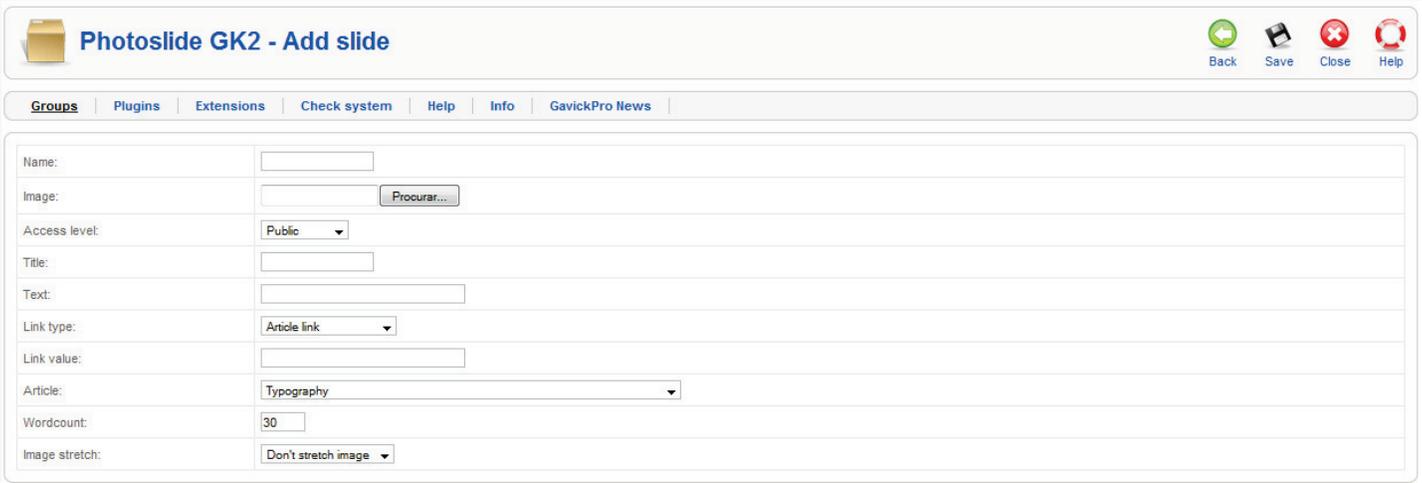

Example configuration used on the demo template group.

After all parameters are set, save it and the group is ready to receive slides.

Adding Slides to Group configuration

Let us now see how to add slides to the group.

First, open the "Groups" panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the "Add slide" button and set the following parameters.

Photoslide GK2 - Add slide

After all slides are set on the group, you can see the general content and making use the AJAX setting preview option, you can easily preview all parameters of each slide and also preview the image for purpose display.

News Image III module installation

Using the Joomla Installer, from the top menu select [Extensions](#) > [Install/Uninstall](#). Click the 'browse' button, select the News Image III module file (*mod_gk_news_image_3.zip*) and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' then select "Continue..."

News Image III module configuration

After successful module installation, from the top menu, go to [Extensions](#) > [Modules Manage](#) and enter in panel configuration of the module. Set the module in the header position and enable it. Before you save it, you must configure the following parameters fields.

Module parameters:

Module Class Suffix:

A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

Module unique ID:

Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newsimage1).

Slides group:

Group with slides (*if list is blank then it means that you must add new group in Photoslide GK2*).

Module background color:

Set the module background color in Hex value or leave blank if for transparent.

Show text block:

Enable or disable the text block display.

Text block opacity:

Opacity of text block - must be float between 0 and 1 or integer - 0,1 (i.e. 0.45).

Text block height:

Set text block height (i.e. 200).

Text block background:

You can select default background from group settings or your own value.

Text block background color:

If you select in previous option your own value - this value must be in hex format (i.e. #000000).

Clean XHTML:

Enable or disable clean XHTML.

Readmore button:

If you want to show readmore button.

Readmore button text:

Text for readmore button (i.e. Read more).

Title as link:

You can enable link in header of article in text block.

Images columns amount:

Set thumbnails columns amount (i.e. 4)

Images rows amount:

Set thumbnails rows amount (i.e. 1)

Images margin:

Set margin between thumbnails (i.e. 5)

Images padding width:

Set padding width in thumbnails (i.e. 3).

Images border width:

Set thumbnails border width (i.e. 1).

Slide animation speed:

Speed for animation effect in ms (i.e. 1000).

Animation interval:

Interval between slides in ms (i.e. 5000)

Autoanimation:

Enable if you want to start animation automatically

Slide animation type:

Select your slide effect for the module.

Text animation type:

If you want to enable opacity effect for text.

Thumbnails position:

You can select position of thumbnails.

Use tooltips:

If you want to show tooltips with content, when cursor is over thumbnail.

Tooltips animation:

If you want to show tooltips with opacity animation, when cursor is over thumbnail.

Links in slides:

Enable this option if you want to set slides as links to articles.

Preloading:

Turn on preloading process.

Advanced Parameters

Module advanced parameters:

Parameters

Module Parameters

Advanced Parameters

Clean template code	<input type="text" value="Enabled"/>
Use MooTools	<input type="text" value="Automatic"/>
Use script	<input type="text" value="Automatic"/>
Use compressed engine	<input type="text" value="Enabled"/>

! Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

! Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

! Use script:

In normal situations, option "automatic" is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

! Use compressed engine:

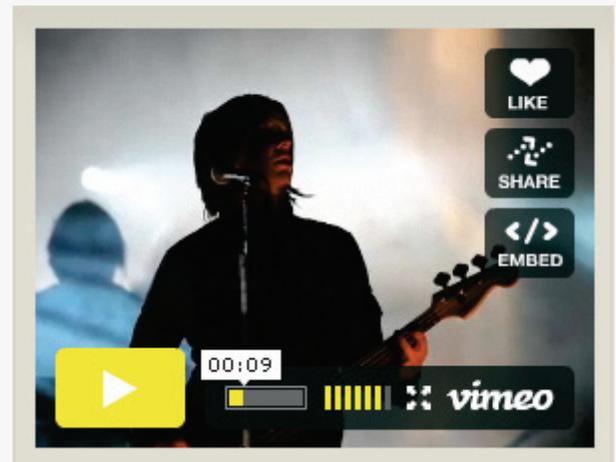

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionally - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

GK Embed Media 1.0 Module

With this great module, you can place your favorite MoviesClips working with direct links media source from YouTube, Google Videos, Daily Motion, Metacafe, Vimeo and others well known Media Source Websites.

You can also display custom flash clips using the Advanced Configuration on the module panel.

Make the eyes and hears of your viewers bump from explosive content.

Module Instalation

Using the Joomla! Administrator, navigate to the administrative panel on your Joomla site. From the top menu, select [Extensions](#) > [Install/Uninstall](#).

Click the 'browse' button, select the module file inside the Modules folder (*mod_gk_embed_media.zip*) and press 'Upload File & Install.' A message will appear saying 'Upload Module - Success.'

This page will display an overview of the module, then select 'Continue...'

Gk Embed Media Module Configuration

After successful module installation, from the Menu go to Extensions > Modules Manage and enter in panel configuration.

Start by the Basic Module Parameters by configuring the following fields:

Module parameters:

Module Class Suffix:

Provides the possibility of set a css class that allow's individual module style.

Module unique ID:

Set here the unique ID of module. You can use more than one module on your Joomla! 1.5.3 website. For each one, this ID must be different.

Media URL:

Here you must place the URL of the flash movie if Media Source Provider is available on the Drop Down Media Source Menu. (*YouTube Example direct link: http://www.youtube.com/watch?v=VIDEO_ID. This URL will be automatically changed to http://www.youtube.com/v/VIDEO_ID for the engine module script.*)

Important ! In Revver and Vidler Media Players, instead of URL as file ID, you must set as ID only the identification of the file. Example for a Vidler Media File URL: [vidler id=VIDEO_ID&w=437&h=288] the ID must only be the VIDEO_ID value and NOT THE LINK.

For all available Media Source Players, the process is the same by setting the direct URL from the video flash.

Player width:

The width of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player width.

Player height:

The height of the media player (*integer value - do not put px after*). Set 0 if you want to use the default player height.

Media Source:

List of Media Source available.

Important ! If your Media Source Player is not available on this menu, you must choose "Other (...)" option and next on the Advanced parameters, you must set the embed code, as we are going to show you in the following explanation.

The screenshot shows the 'Parameters' configuration panel. Under 'Module Parameters', the following fields are visible:

- Module Class Suffix:
- Module unique ID:
- Media URL:
- Player width:
- Player height:
- Media source: Other(metacafe, vimeo, flickr) [dropdown]

 An 'Advanced Parameters' section is also visible at the bottom, currently collapsed.

The screenshot shows the 'Advanced Parameters' section expanded. It includes settings for:

- YOUTUBE:** Show related videos (radio buttons: Disabled, Enabled), Show player border (radio buttons: Disabled, Enabled), Select player style (dropdown: Standard), Color 1 (input: 0x000000), Color 2 (input: 0x000000).
- GOOGLE VIDEO:** Allow fullscreen (radio buttons: Disabled, Enabled).
- VEOH:** Allow fullscreen (radio buttons: Disabled, Enabled), Player background (input: #000000).
- DAILY MOTION:** Video autoplay (radio buttons: Disabled, Enabled), Daily motion player size (radio buttons: Small, Medium, Large), Allow fullscreen (radio buttons: Disabled, Enabled), Player background color (input: 000000), Player glow color (input: 000000), Player foreground color (input: FFFFFFFF), Player special color (input: 000000).
- REVVER:** Video autoplay (radio buttons: Disabled, Enabled), Show related videos (radio buttons: Disabled, Enabled).
- VIDDLER:** Allow fullscreen (radio buttons: Disabled, Enabled), Video autoplay (radio buttons: Disabled, Enabled).
- OTHER:** Player type (radio buttons: Simple player, Default player).

 At the bottom, there is a text area for 'Embed code for other players' containing a complex HTML embed code for a video player.

By selecting one available Media Player on the Module Parameters, you may change it's configuration on each Player. Naturally, if you pick the YouTube Media Player, the rest of the parameters from others are indifferent.

Each Media Player provide us the possibility to set some different configurations, like size player or the Related Videos Option.

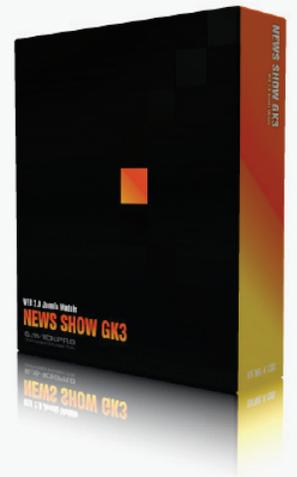

The final field "Advanced configuration of other player" is needed if you choose in Module Parameters a different Media Source Player, different from the available ones. Here you must place the code of the flash media URL

Please, take note of this important notices:

- » For Daily motion player options WIDTH and HEIGHT doesn't works - We provide 3 sizes for the player size.
- » Like we said before, other player option means every player which can be added by embed tag. So if you don't know how the correctly code of the embed file, them we recommend you to drop this option and select a available Media Player.
- » **VERY IMPORTANT!!!** If you insert a public media player code that it is provided by the source media, you need to add the `wmode="transparent"` parameter to avoid overflow with the template display.

News Show GK3 Module installation and configuration

Again, to avoid duplicate instructions for the News Show GK3 module, please check the respective HelpFile of this tool, available on `_doc!` folder package or download it from our free section Joomla!1.5 Tools.

News Image III module installation

Using the Joomla Installer, from the top menu select `Extensions > Install/Uninstall`. Click the 'browse' button, select the News Image III module file (`mod_gk_news_show_gk3.zip`) and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' them select "Continue..."

News Image III module configuration

After successful module installation, from the top menu, go to `Extensions > Modules Manage` and enter in panel configuration of the module. Set the module in is position and enable it.

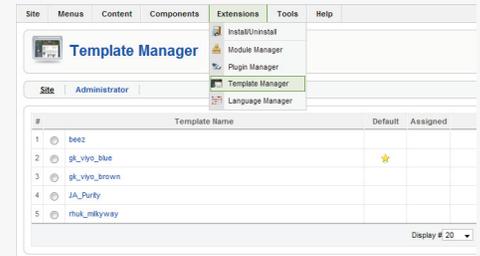

Before you save it, you must configurate the respective parameters fields.

Once again, please check the HelpFile of this module and see the details of the parameters available.

VIYO parameters configuration

You can set the template parameters by selecting the gk_viy0 template on Template Manager. Navigate to Extensions > Template Manager and search for the VIYO template.

Press “edit” option and you be able to see the following parameters table.

Basic template parameters:

IE6 alert:

You can enable this option to display a warning message to your website visitors, recommending the use of a different internet browser more current and secure.

Header position width:

Set width for header position in pixels (i.e. 475)

Show mainbody on frontpage:

Enable/disable the mainbody on frontage.

Interface parameters:

Login button:

Enable this option if you want to show login button and login area.

Slider in menu:

Enable additional effect under menu.

Scalable font size:

Enable additional buttons to increase/decrease/reset font size.

Logo as image:

If you want to have normal image instead of link with background - enable this option. **IMPORTANT!!!** when you enable this option, style change won't change your logo till page refresh.

Background switcher:

Enable this option if you want to enable background switcher.

Background type:

Select background type.

Parameters

The parameter file \templates\gk_viy0_blue\params.ini is **writable!**

Basic template parameters	
IE6 alert	Enabled
Header position width	475
Show mainbody on frontpage	Enabled
Interface parameters	
Login button	Enabled
Slider in menu	Enabled
Scalable font size	Enabled
Logo as image	Enabled
Background switcher	Enabled
Background type	Background 1
Menu parameters	
Menu type	MooMenu
Menu name	mainmenu
Menu speed	180
Menu animation	linear
Menu width animation	Enabled
Menu height animation	Enabled
Menu opacity animation	Enabled

Menu parameters:

Menu type:

Select the main menu type to by use on the frontpage.

Menu name:

Identify the ID of the menu for display.

Menu speed:

Set speed menu animation.

Menu animation:

Select type of menu animation transition effect.

Menu width animation:

Use animation width in menu.

Menu height animation:

Use animation height in menu.

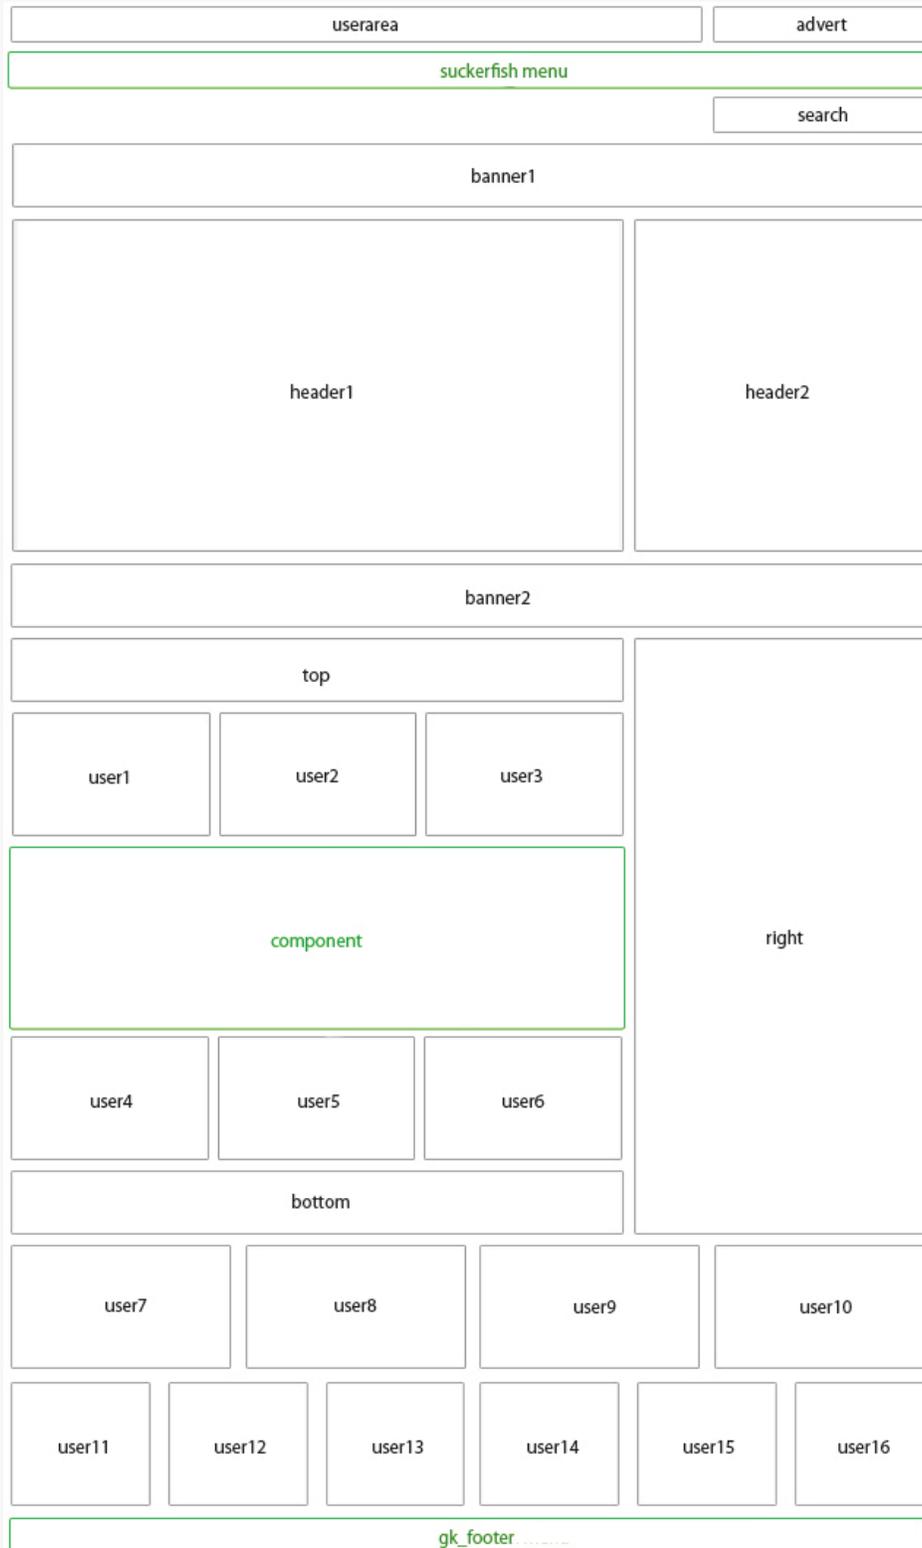

Menu opacity animation:

Enable/disable the use of opacity animation in menu.

11

Modules Positions

VIYO template supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right and the 'component' will fill the entire width.

12 Modules Variations

VIYO provides the ability to use 3 module variations to increase the appeal of your module content. To use these you just need to add for example “_clear” in the module class suffix parameter of the module in the module manager.
