- W3C XHTML 1.0 Transitional. W3C CSS Valid
- Fully compatible IE7, Firefox 2+, Firefox 3, Flock 0.7+, Netscape, Safari, Opera 9.5, Chrome.
- Delivered with source Adobe .PSD files.
- Delivered with "QuickStart Package"

YourFlash.com - Overview files

The first step to do is download all the files available on our exclusive MemberShip section and also some files that are available on our free section tools. Before we start the template installation, let´s see a brief overview of the files available inside the YourFlash.com package release.

Since some tools used on this template have their own HelpFile, this Manual will give you the major orientation guide to make your installation. For further and details informations about our tools, please read the respective HelpFiles available on this package or on our free tools download section.

! Sugestion!!!

We strongly recommend some regular visits to our update.gavick.com website, because it may be available some updates of the template and tools used on this project. Also, we invite you to visit our oficial blog on - blog.gavick.com - where we, from time to time, give some usefull information and tips on how to customize or change some features of our templates and tools.

So, here's a brief overview of the files available inside the "YourFlash.com" Template pack release.

You downloaded the following two compressed files:

gk_yourflash_J!15.tgz

This is the template file installation.

gk_yourflash_J!15_rest_files.zip

! Important!

You must unpack the this file before doing anything - gk_yourflash_J!15_rest_files.zip package.
After unpack you will find the following "gk_yourflash_J!15_rest_files" folder witch contains the following files:

_doc!!! "folder"

Here's the present Instructions Manual, the PhotoSlide GK2 Component and also the Tabs Manager GK HelpFiles.

_quickstart!!! "folder"

The YourFlash.com package comes with a QuickStart package installation. If you are making a new Joomla installation, we strongly recommend this option, because this is the most easy way installation process! Includes all files needed to set exactly as we show in the "YourFlash.com" demo.

component "folder"

This contains instructions on how to download ours free components - the PhotoSlide GK2 and the Tabs Manager GK2. .

modules "folder"

Gavick News Image III module (*mod_gk_news_image_3.zip*) is the module that will display the products image slide on your webpage the group that will be set on PhotoSlide GK2 configuration.

Gk News Image III Plugin (*plg_gk_news_image_3.zip*) is the News Image III plugin that must be installed, using the PhotoSlide GK2 component administration.

News Show GK3 module - Instructions to download our free J!1.5 module, available on www.gavick. com. You need to download this tool from our download section.

source "folder"

The source psd. format files for Photoshop Graphic Editor, that you can use for complete customization of your website design. Notice!! The font type used on the source files are not provided with the Template package, because they may have copyrights reserved.

! Recommendation !!!

We strongly recommend the QuickStart installation, but if you need to install the YourFlash.com template on a existing website, doing step by step installation, first you must check if you have the lastest Joomla!1.5 version and if not, please upgrade before any installation.

YourFlash.com QuickStart installation

Why do we recommend this installation option? Well, because it's the easiest way to install our template and to take advanced immediatly to all components, plugins and modules configurations. It's like a normal Joomla!1.5 installation and it includes all files neede. It will set your joomla website exactly as we show the YourFlash.com Template in our demo.gavick.com.

Again, we invite you to visit us regulary, because all Joomla!1.5 future upgrades may force us to upgrade all our template and the respetive tools. So, keep in touch on update.gavick.com.

! Sugestion!!!

Make use of this option and learn the environment of YourFlash.com template, by making some tests locally, using a local server like (i.e. Wamp or Xampp Local Server) or other available for free in the interner. This way, you be able to install, run and test easily all the potencial of this template.

Well, let's do it! If you follow this unique basic steps, your should not have any problems at all with the QuickStart installation.

Installation Steps for the QuickStart!!! version:

Step 1) Unpack the compressed file QUICKSTART-nov2008.zip inside of the _quickstart!!! folder and upload the content to your clean joomla website directory folder installation. The files inside are similar to a normal Joomla!1.5 package.

Step 2) Create a new Database in your Website.

Step 3) Make a normal Joomla J!1.5 installation using the upload files. Notice!!! You will see that it's no necessary at this time to set your Username and Password, because they are already set.

Step 4) After ending the installation, enter in the Administrator using Username "admin" and password "demo" *(Naturally, you can change this values after!!!).*

That's it! No more, no less. If you go to your new Joomla Installation frontpage, you will see exactly as our demo. Now, you can start working on your own content and others changes.

YourFlash.com

YourFlash.com Quick Guide Step by Step Installation

For those who need to install the template manually and do not need further details information, we prepare the following short cut, step by step task list for the YourFlash.com installation.

! Important recomendation!!!

Before starting the installation, please be sure to check if you have the latest Joomla!1.5 version and if not, we strongly recommend that you upgrade your joomla website.

Step 1 - Install the YourFlash.com template (*gk_yourflash_J!15.tgz*), using the Joomla Installer.

Step 2 - Go to the Templates Manager and set the "gk_yourflash" template to default.

Step 3 - Using the Joomla Installer, install the PhotoSlide Gk2 (com_gk2_photoslide.zip) component.

Step 4 - Go to the PhotoSlide GK2 administration (do not use the joomla installer!!!), select "plugins" menu and install the Plugin Gk News Image III (*plg_gk_news_image_3.zip*). Don't forget to enable this plugin!!!

Step 5 (Optional) - Go to the PhotoSlide GK2 administration, select "Extensions" menu and install the Rainbow Extension tool (ext_rainbow.zip). Don't forget to enable this extension, if you want to use it.

Step 6 - Go the Joomla Installer! and install the Gk News Image III module (mod_gk_news_image_3.zip). You now can start working by creating your slide groups on the PhotoSlide GK2 administration.

Step 7 - Using the Joomla Installer, install the Tabs Manager GK2 component (com_gk2_tabs_manager.zip).

Step 8 - Go to the Tabs Manager GK2 administration (do not use the joomla installer!!!), select "plugins" menu and install the Tabs Mix GK1 Plugin (plg_tab_mix_gk1.zip). Don't forget to enable this plugin, after sucessful installation!!!

Step 9 - Go to the Joomla Installer! and install the Tabs Mix GK1 module (mod_tabmix_gk1.zip). You now can start working by creating your slide groups on the Tabs Manager GK2 administration and set it on the module.

Step 10 - With all previous 9 steps done, your template have all the necessary files installed. If you need some orientation of the demo modules positions, please see the screenshot on the next page!

! Notice!!!

Please, take note that if you are installing our template and tools in a "unclean" joomla website (with some 3th party components, modules or plugins), we cannout garantee that all will work in perfect conditions. We can only guarantee the proper functioning of our tools or template funcionality. If you find any inconsistency with another script, use the forum support and if possible, we will try to find a solution, but without any compromise.

YourFlash.com

YourFlash.com template installation

Navigate to your Joomla! Administrator and enter in the administrative panel on your Joomla site.

From the top menu, select Extensions > Install/Uninstall.

Click the 'browse' button, select the template file *(gk_yourflash_J!15.tgz)* and press 'Upload File & Install.'

A message will appear saying 'Upload template - Success.'

This page will display an overview of the template, then select 'Continue...'

After the template is sucessful installed, you must set it as your default template. To do that, navigate to Extensions > Template Manager and set the "gk_yourflash" Template as default joomla template.

With the template installed, next we are going to explain how to install the others files needed (components, modules and plugins).

PhotoSlide GK2 Component Installation

The PhotoSlide GK2 is the most advanced and free News Slide Image component available for Joomla!1.5. For further detail information, please read the PhotoSlide GK2 HelpFile provided in the _doc! folder package.

You need to download this package from our free tools download section on www.gavick.com and them unpack first this fiile.

Using the Joomla Installer, search for the com_gk2_photoslide.zip and select "upload and install"

A message will appear saying 'Upload Component - Success" and it will show you an overview of the template. Then select "Continue"...

Gk News Image III Plugin Installation

As you can notice on the PhotoSlide GK2 Helpfile, every module design for this component, needs to have first installed the respective plugin, that will interact between the component and module.

The process installation of the plugin is exactly the same as stated on the HelpFile.

Notice!!!

Please, do not use the Joomla Installer to install this plugin. You need to use the PhotoSlide component administrator do install any plugin or extension available.

So, navigate to the PhotoSlide GK2 administration, select "plugins" option and choose "Install Plugin". Then search the plg_gk_news_image_3.zip file locally and click "Save" on right menu.

If all goes well, you should be able to see the plugin sucessful installed, like the following screenshot indicates.

| Groups | Plugins | Extensions | Check system | Help | Info | GavickPro News |

ⓘ Plugin has been installed successfully

#	ID	☐	Status	Name	Description	Type	Version
1	2	☐	💡	GK News Image III	XML file for module Gavick News Image III	module	2.0

Tip: You must install plugin for each module which you want use on your site before create groups of slides for this modules

The next step is to select the plugin, by enable the check box and on the right menu, click on "Enable Plugin".

YourFlash.com

The next step is to select the plugin, by enable the check box and on the right menu, click on "Enable Plugin".

The plugin is now enable on the PhotoSlide GK2 and you can start creating your own groups.

Add Groups in PhotoSlide GK2 configuration

Since we already have the plugin installed, let's see how to create a group on the PhotoSlide GK2.

The process is the same as stated on the PhotoSlide GK2 HelpFile, but as you already may know, each groups for different modules types have their own parameters to set. The Gk News Image III is no exception to this rule. So, select the "Groups" option and click on "Add Group" option. As we only have one plugin installed, this will be assume by default on the group creating process.

The following parameters are the ones that you will need to set on the group configuration:

Group name:

For identification of the group, that will be necessary on the module configuration.

Image quality (0-100):

If there's a group with a big number of slides to be display, you can avoid most posible, long time loading page. So, we can use this option to increase speed loading of the module, by decreasing the image quality percentage to maximum, without cross over the fair quality needed, of course.

Image width and height:

Set image width and height in pixels.

Thumbnails width and height:

Set thumbnails width and height in pixels.

Background color:

Color value in hex format for background (i.e. #FFFFFF).

Title color:

Color value in hex format for Title (i.e. #FFFFFF).

Text color:

Color value in hex format for text (i.e. #FFFFFF).

Link Color:

Color value in hex format for Link text (i.e. #CCCCCC).

Hover Link color:

Color value in hex format for Hover Link user event effect (i.e. #000000).

Groups	Plugins	Extensions	Check system	Help	Info	GavickPro News	

Group name:	Header - Demo cont
Images quality (0-100):	75 %
Image width:	590 px
Image height:	282 px
Thumbnail width:	105 px
Thumbnail height:	48 px
Background color:	#000000
Title color:	#FFFFFF
Text color:	#cccccc
Link color:	#ffffff
Hover link color:	#85BAD2

Example configuration used on the demo template group.

After all parameters are set, save it and the group is ready to receive slides.

Adding Slides to Group configuration

Let us now see how to add slides to the group.

First, open the "Groups" panel on the Photoslide GK2 administration, click on the group create and you will enter on the group slides content panel. As you can see, there's no slides created, so we will just to fix this, by pressing the "Add slide" button and set the following parameters.

Name:
Set the name of the slide.

Image:
Select the source image slide for uploading purpose.

Access level:
Set level access for image display (public, registered or special).

Title:
Set news title for module displayment.

Text:
The text of the slide to be show on the module display *(if you choose bellow your own title and text display).*

Link type:
Set if you want your own link or the link of an existent article.

Link value:
If you choose previously your own link type, set it here or leave it blank if you didn't *(ex. http://mylink.com).*

Article:
If you choose an article link, set it here or leave the "Your own title and text" set.

Word Count:
Set the number of words to be display on the slide from the article or from your text.

Image stretch:
If you have an image smaller or bigger from the module display option, choose "Stretch image" and this will automatically reset the image dimensions to fill totally the module. This option may withdraw some quality image if the same have some dimension not proportional from the module. If you have a image with same dimension set on the module, set it "Don't stretch image" option.

Screenshot of the group created for the demo template.

After all slides are set on the group, you can see the general content and making use the AJAX setting preview option, you can easily preview all parameters of each slide and also preview the image for purpose display.

News Image III module installation

Using the Joomla Installer, from the top menu select <u>Extensions</u> > <u>Install/Uninstall</u>. Click the 'browse' button, select the News Image III module file *(mod_gk_news_image_3.zip)* and press 'Upload File & Install.'

A message will appear saying 'Install Module Success.' them select "Continue..."

Notice that, you may see some warning messages, saying that some language files were not installed. This is perfectly normal, because if you don't have those language on your Joomla!1.5 web site, the setup file will not be able to create this files.

News Image III module configuration

After successful module installation, from the top menu, go to Extensions > Modules Manage and enter in panel configuration of the module. Set the module in the header position and enable it. Before you save it, you must configure the following parameters fields.

Module parameters:

Module Class Suffix:
A suffix to be applied to the css class of the module (table.moduletable), this allows individual module styling

Module unique ID:
Unique ID for module (must be unique if you have two or more modules on one page) (i.e. newsimage1).

Slides group:
Group with slides *(if list is blank then it means that you must add new group in Photoslide GK2).*

Module background color:
Set the module background color in Hex value or leave blank if for transparent.

Show text block:
Enable or disable the text block display.

Text block opacity:
Opacity of text block - must be float beetween 0 and 1 or integer - 0,1 (i.e. 0.45).

Text block height:
Set text block height (i.e. 200).

Text block background:
You can select default background from group settings or your own value.

Text block background color:
If you select in previous option your own value - this value must be in hex format (i.e. #000000).

Clean XHTML:
Enable or disable clean XHTML.

Readmore button:
If you want to show readmore button.

Readmore button text:
Text for readmore button (i.e. Read more).

Title as link:
You can enable link in header of article in text block.

Images columns amount:

Set thumbnails columns amount (i.e. 4)

Images rows amount:

Set thumbnails rows amount (i.e. 1)

Images margin:

Set margin between thumbnails (i.e. 5)

Images padding width:

Set padding width in thumbnails (i.e. 3).

Images border width:

Set thumbnails border width (i.e. 1).

Slide animation speed:

Speed for animation effect in ms (i.e. 1000).

Animation interval:

Interval between slides in ms (i.e. 5000)

Autoanimation:

Enable if you want to start animation automatically

Slide animation type:

Select your slide effect for the module.

Text animation type:

If you want to enable opacity effect for text.

Thumbnails position:

You can select position of thumbnails.

Use tooltips:

If you want to show tooltips with content, when cursor is over thumbnail.

Tooltips animation:

If you want to show tooltips with opacity animation, when cursor is over thumbnail.

Preloading:

Turn on preloading process.

▼ Advanced Parameters

Clean template code	Enabled
Use MooTools	Automatic
Use script	Automatic
Use compressed engine	Enabled

! Clean template code:

Now modules support new technique of assets JavaScripts files. If you want to get rid all configuration scripts to imported scripts then enable this option. Value disabled means that configuration scripts will be placed in template code (old method).

! Use Mootools:

Use this option only if you have a problem with scripts on your site. In other situations option automatic is strongly recommended. If you want to run more than one copy of this module on same page then set this value for disabled. Also if you have an mootools framework in version 1.11 included on your site, then disable this option also.

! Use script:

In normal situations, option "automatic" is strongly recommended. Use this option only if you have a problem with scripts on your site. If you want to run more than one copy of this module on same page, then set this value for disabled.

! Use compressed engine:

To minimise file size you can use compressed version of engine, but for debugging you should use uncompressed version of engine script (then disable this option). Additionaly - when you use more than one copy of this module per one page, then you must set this same value of this option for all instances of module.

Tabs Manager GK2 and Tabs Mix GK1

Installation and Configuration

To avoid duplicate instructions for the Tabs Manager GK2 component and Tabs Mix GK1 module, please check the respective HelpFile of this tools, available on _doc! folder package or download it from our free section Joomla!1.5 Tools.

Anyway, here's a screenshot of the group set on our demo template and each tabs type.

Style switcher	Enabled
Show mainbody on frontpage	Disabled

Menu opacity animation:

Enable/disable the use of opacity animation in menu.

IE6 alert:

You can enable this option to display a warning message to your website visitors, recommending the use of a different internet browser more current and secure.

Header position width:

Set width for header position (used for the News Image III module).
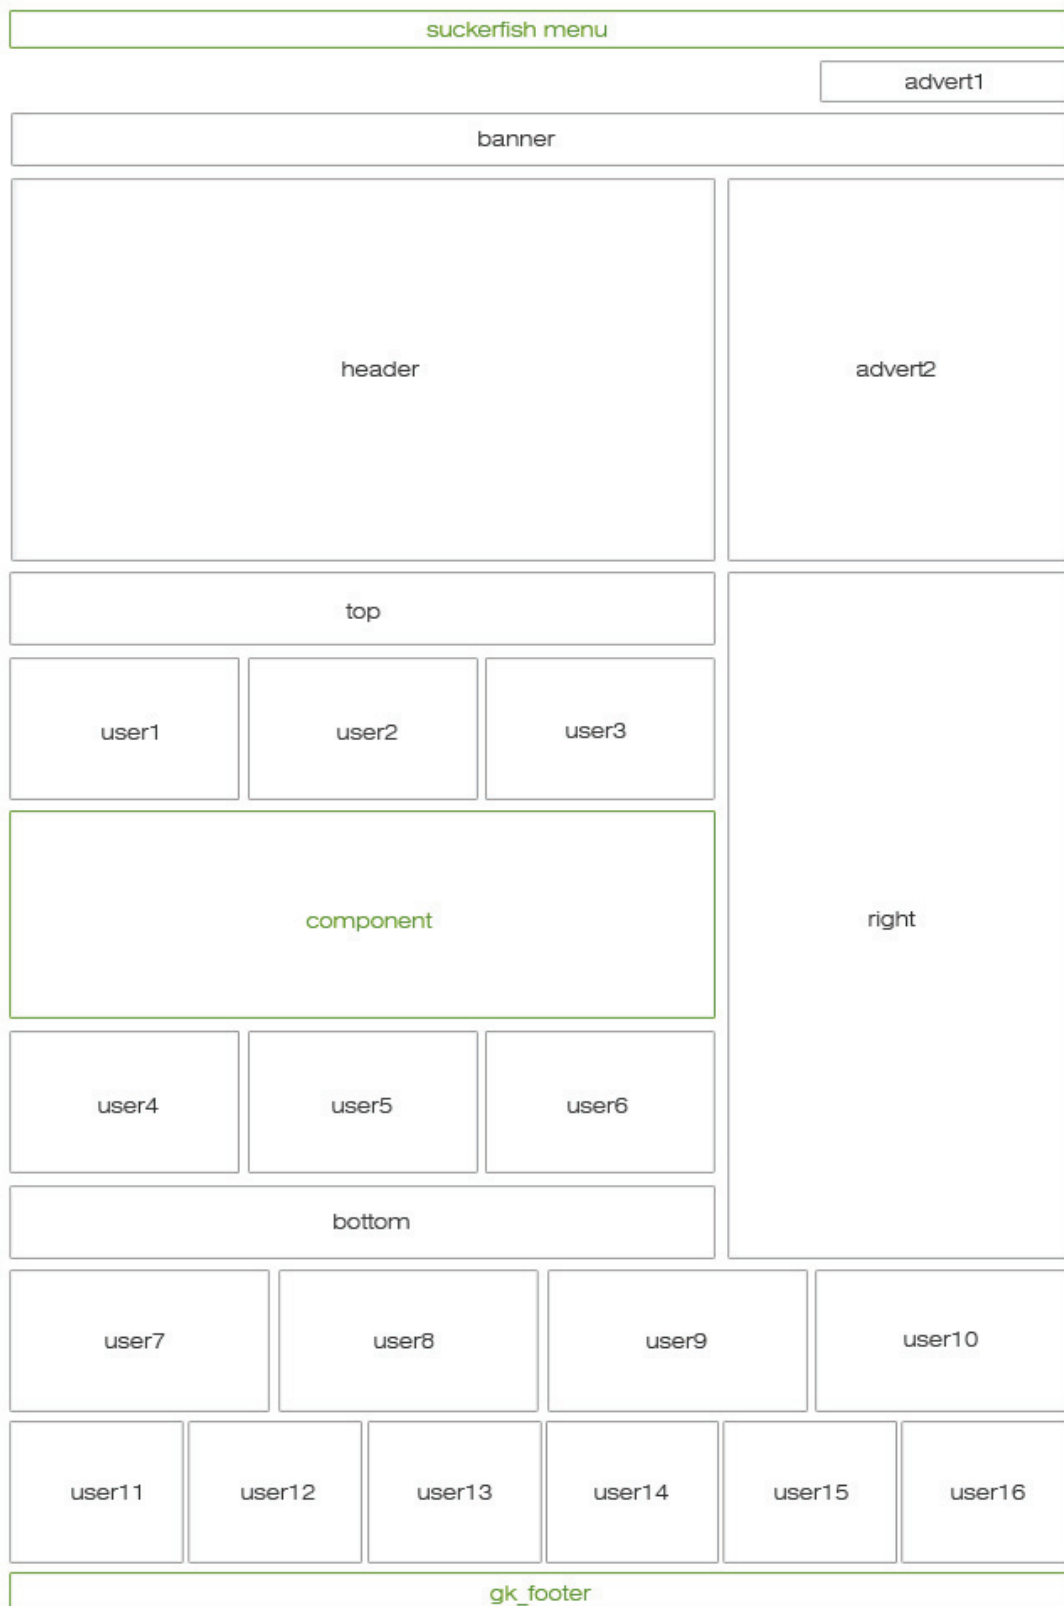

Style switcher:

Enable/disable the bottom style switcher.

Show mainbody on frontpage:

Enable/disable the mainbody on frontage.

The YourFlash.com supports full width configurations for use with galleries or forums, make sure you do not publish any modules in right and the 'component' will fill the entire width..

Yourflash.com provides the ability to use 4 module variations to increase the appeal of your module content. To use these you just need to add for example "_text" or "_clear" in the module class suffix parameter of the module in the module manager.
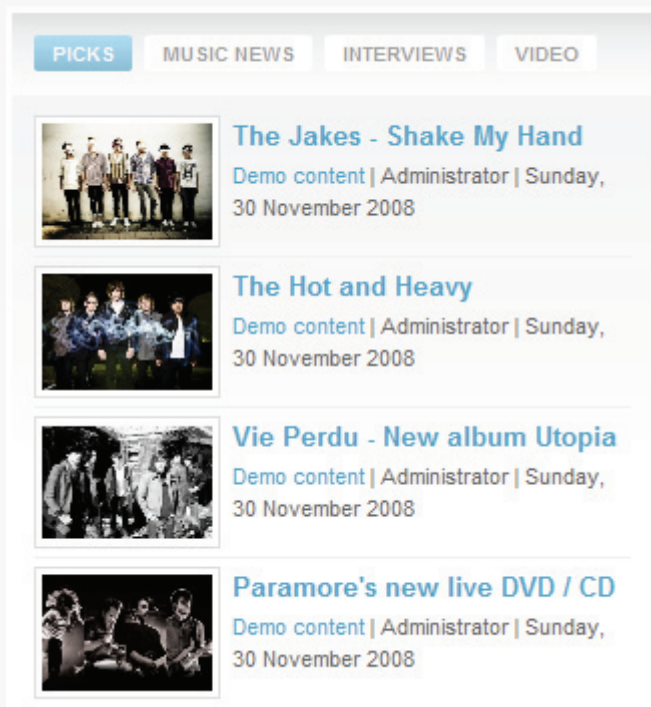

When you don't use the suffix your modules will look like this:

When you use the "_col1" suffix your modules will look like this:

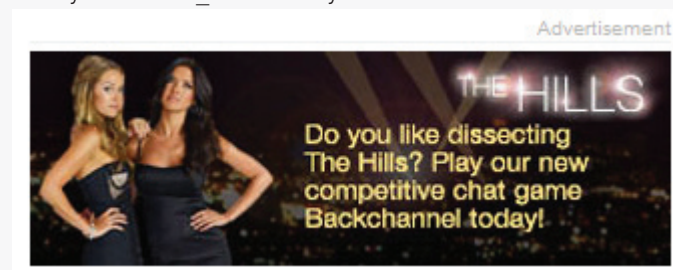

When you use the "_tab" suffix your modules will look like this (specific for tabs mix module):

When you use the "_text" suffix your modules will look like this:

When you use the "_clear" suffix your modules will look like this:

Blue Style

This page presents most of typographical aspects of YourFlash.com template, using a nice blue style scheme. Make your readers happy with great Typography and User Experience!
