## Terms of Use

All the materials and/or graphics contained in the IceTheme template folders MUST be used ONLY with the IT HeadLine Template from IceTheme.com

## TABLE OF CONTENTS

1- Introduction	3
2- Installing IT HeadLine Template in Joomla 1.5.x	3
3- Setting up IT HeadLine <b>with</b> the sample data	4
4- Setting up IT HeadLine <b>without</b> the sample data	4
5- More Information	9

## 1- Introductions

These instructions are for installing the template and associated modules, with or without the sample data included.

The Sample Data is very helpful and enables you to setup the template exactly as the demo. If you have data already on your system that you would like to keep, do NOT install the Sample Data.

The setup instructions for installing with and without the sample data are shown below.

The IT HeadLine template package contains the following files

- IT HeadLine Template
- IT HeadLine Sample Data
- IceSlider (ImageSlide, TabularSlide and CarouselSlide) Module
- IceSlideShow Module
- IceScroller Module
- IceAccordion Module
- JWeather Module

## 2- Installing IT HeadLine Template in Joomla 1.5.x

### **Note:**

The instructions below assume that you have first successfully installed Joomla on your server. For more information on how to install Joomla please follow the [Joomla QuickStart](#) page

- 1) Extract the content of the IT HeadLine All in One package on your computer.
- 2) Install IT HeadLine Template from Joomla Administrator.
- 3) Install in the same way the following modules which are on the package.
  - a. IceScroller
  - b. IceSlider
  - c. IceSlideShow
  - d. IceAccordion
  - e. JWeather
- 4) Make the IT HeadLine Template the default template within Joomla Template Manager in Joomla Administrator.

### 3- Setting Up The Template **With** Sample Data

#### **Important:**

Installing the sample\_data.sql file into your database will delete all your current data. It means that it delete all your content from your site and all the configurations that you have done. Do NOT install if you have an existing running site. Please follow the section "Setting up the Template without Sample Data" Below.

- 1) Extract the content of the Sample Data zip file on your computer.
- 2) Copy the folder "images" into your Joomla root directory.
- 3) Open your Joomla Database using a program like PHPMyAdmin and import the sample\_data.sql file.

You can login into your Joomla Administrator panel with:

Username: **admin**

Password: **icetheme**

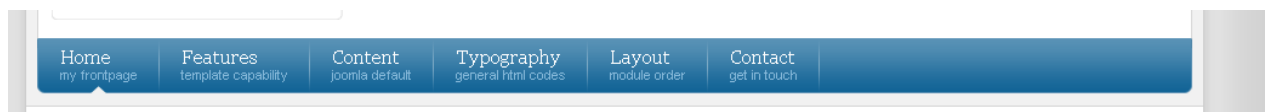

*You can change your password from your Joomla Administrator panel by going on User Manager and select the admin account.*

### 4- Setting Up The Template **Without** Sample Data

After you have successfully installed the template you need to know how to make use of the modules and their positions. To get use of all the module variations and positions for this template simply go the template demo and click on the Layout menu item.

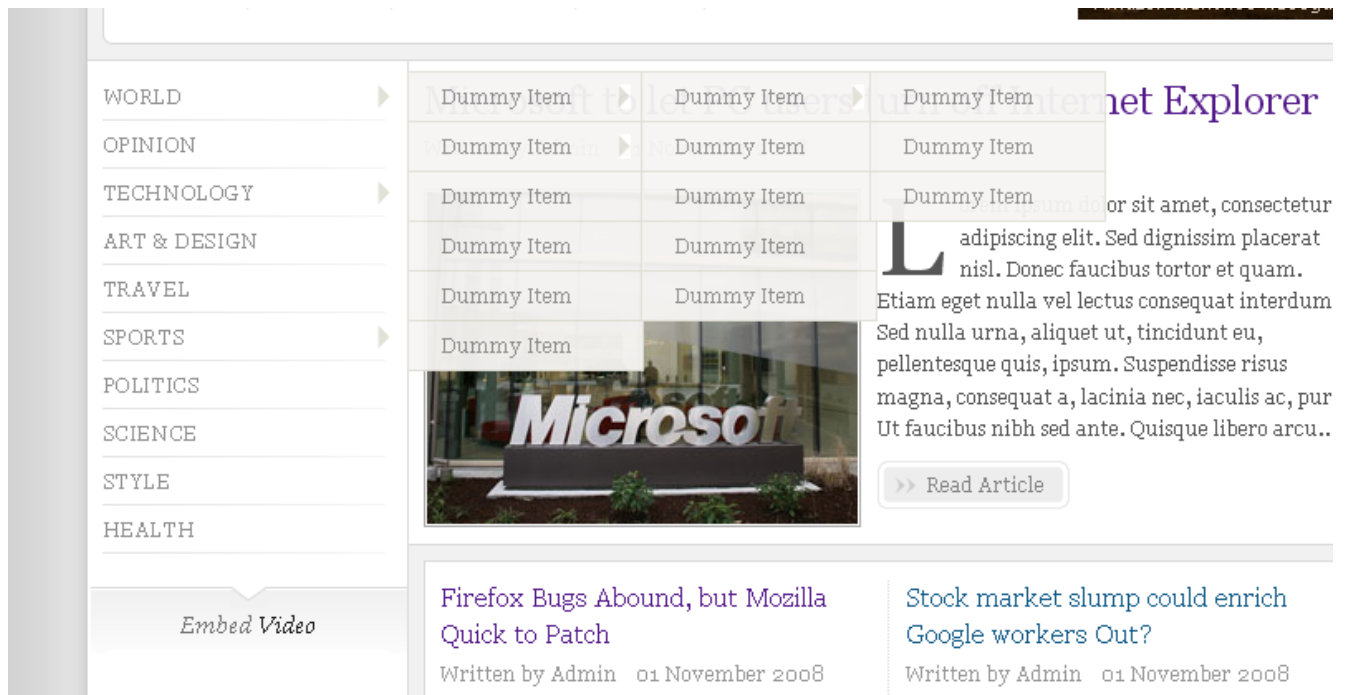

Below we will demonstrate some of the core parameters that need to be setup.

#### 1) Main Menu (With Drop-Down Feature)

- a. Position – mainmenu
- b. Menu Style – List
- c. Always show sub-menu Items – Yes
- d. Menu Tag ID – nav
- e. Activate Parent – Yes

## 2) OtherMenu (With Drop-Down Feature)

- a. Position – othermenu
- b. Menu Style – List
- c. Always show sub-menu Items – Yes
- d. Menu Tag ID – othermenu
- e. Activate Parent – Yes

### 3) IceScroller Module
