

Installing MediaMogul

The following is a guide that covers how to set up your new **MediaMogul** template on your Joomla site. Here you can find an overview of the files included in the MediaMogul release and instructions on installing and activating the template in your Joomla install.

Downloading the MediaMogul Files

The first step is to download all of the files that will be needed to install your template, custom modules, as well make modifications. Here is a quick explanation of each of the available files in the **MediaMogul** release.

- ❖ **MediaMogul Template** (*rt_mediamogul.tgz*) This file is the template package you will use to install your template into Joomla.
- ❖ **MediaMogul Custom Extensions** (*mediamogul_extensions.zip*) This package contains each of the individual custom extensions included in the MediaMogul template release.
- ❖ **MediaMogul Source PNG's** (*mediamogul_sources.zip*) This zip contains the source png's for making modifications and customizations to the images in the template as well as the logo font. There are additional sources for the transparent background, buttons, typography and headers. You will need an image editing software (preferably Adobe/Macromedia Fireworks) to utilize the Source PNG files.

Installing the MediaMogul Template into Joomla

To install the **MediaMogul** template into your Joomla site, follow these steps:

Go to your Admin control panel for your site. In the Menu at the top, go to **Installers > Templates – Site**. Next browse for your **rt_MediaMogul.tgz** file you downloaded and then click **Upload File & Install**. Now **MediaMogul** is installed and in your template list.

Install new Template [Site]

Upload Package File

Package File:

Next, from your admin control panel, go to Site > Template Manager > Site Templates. This will pull up the list of your installed templates. Find MediaMogul on the list and select the radio button to the left and then click Default up in the top right corner. Now MediaMogul is set as your default template. If you view your site, you should see the MediaMogul template up and running.

#		Name	D
