

Meridian Module Positions

Meridian has been constructed with an assortment of 30 module positions allowing for versatility and flexibility. These module positions are fully collapsible meaning that if there are no modules published in a particular area, that module area will not be shown.

Several of these positions may not appear to be positions, such as the Logo, Footer and Toolbar. However, by publishing modules to see positions, the elements are automatically disabled and replaced by your module content.

Stuff', 'Wrapper', 'RocketTheme', and 'RocketWerk'. Below this is the 'meridian' logo and a search bar labeled 'SEARCH'. The main content area is divided into several sections:
