

Versatility4 Demo Content

The demo for Versatility4 utilises a large stock of custom code and styling to make the most of every content item and show what Versatility4 can do. This basically means that the HTML used in the custom modules and content have customisations which employ the characteristics of the template to make the "perfect" content.

This demo content section will take you through some of the content areas and general techniques used to further your understanding and help you realise the true potential of Versatility. If you would like to quickly deploy a replica of our Versatility4 demo for a new Joomla site, be sure to check out our RocketLauncher package.

The Bottom Menu

For the bottom menu, you will need to use the following settings in Admin -> Modules -> Site Modules -> Other Menu :-

** Position: bottom*

** Menu Class Suffix: -bottom*

** Menu Style: Flat List*

Read More Buttons

Read more buttons are automatically generated for content items that use the intro and main text option. However, you can easily insert them manually as witnessed on this demo. Use the following code:

```
<a href="your_link" class="readon">Read More...</a>
```
