

Integrated RokSlide Tabbed Modules

For Vertigo, we have integrated RokSlide into the core of the template so you have the RokSlide functionality in terms of tabs with stylish transitional effects with the modular layout of the template.

RokSlide by default has 10 tabs available. Each tab has a module position ranging from User10 to User19, respective to the individual tab. Therefore, you have a single modular position per tab but you have the option of applying multiple modules to a single position. For example, you can assign 3 modules to the User11 position and they will appear in a horizontal layout in Tab 1.

You can continue RokSlide in the template manager settings.
